We, YoungHyun Jun and Sooncheol Park, as a CEO and the executive in charge of reporting, respectively, certify that we have thoroughly reviewed the half-year business report of Samsung Electronics Co., Ltd. for the six-month period ended June 30, 2025.

Based on our knowledge, this report does not contain any untrue statements of material facts or omit any material facts; and it does not contain any statements that are intentionally misleading for the users of the information in the report.

We confirm that Samsung Electronics operates the Internal Controls over Financial Reporting, as defined in Article 8 of the Act on External Audit of Stock Companies.

Date: August 14, 2025

YoungHyun Jun

Vice Chairman and CEO
Samsung Electronics Co., Ltd.

Executive responsible for reporting: Sooncheol Park

Vice President and CFO
Samsung Electronics Co., Ltd.

I. Corporate Overview

1. Overview

A. Legal, Commercial name:

- Samsung Electronics Co., Ltd.

B. Date of establishment:

- Samsung Electronics Co., Ltd. (“SEC” or “the Company”) was established as Samsung Electronics Industry Co., Ltd. on January 13, 1969, and held an initial public offering on June 11, 1975.
- SEC changed its name from Samsung Electronics Industry Co., Ltd. to Samsung Electronics Co., Ltd. following a resolution passed at the Annual General Meeting (AGM) of shareholders on February 28, 1984.

C. Address, phone number, and English language website of the corporate headquarters

- Address: 129, Samsung-ro, Yeongtong-gu, Suwon, Gyeonggi-do, Korea
- Phone Number: +82-31-200-1114
- Website: <https://www.samsung.com/>

D. Core businesses

- The Company consists of the Device eXperience (DX) Division and Device Solutions (DS) Division, Samsung Display (SDC) and its subsidiaries, and Harman International Industries, Inc. (Harman) and its subsidiaries. SDC runs the display panel business, and Harman operates businesses related to automotive electronics components, etc.

SEC is a global electronics firm comprised of its headquarters in Korea and 230 subsidiaries across the world, including production and sales subsidiaries under 9 regional headquarters for the DX Division, 5 regional headquarters for the DS Division, and SDC and Harman.

Key products by each organization are set forth below:

Organization	Key products
DX Division	TVs, monitors, refrigerators, washing machines, air conditioners, smartphones, telecommunications network systems, computers, etc.
DS Division	DRAM, NAND flash, mobile APs, etc.
SDC	OLED panels for smartphones, etc.
Harman	Digital cockpits, car audio, portable speakers, etc.

[DX Division]

The DX Division consists of businesses engaged in the manufacturing and sales of TVs, monitors, refrigerators, washing machines, air conditioners, smartphones, tablets, wearables, and network systems.

In the TV market, Samsung has led the market in sales since 2006, with 2024 marking our 19th year in the top position. And amid intensifying competition, we are further widening the technological gap with competitors by applying new AI technologies to our flagship products and super big TVs in particular. Additionally, the Digital Appliances businesses deliver exceptional functionalities featuring technologies that integrate sustainability and efficiency while continuously developing products and services that improve convenience, guided by our deep insights into evolving lifestyles.

In the mobile business, we became the global leader in shipments in 2011 and have maintained that position for 14 straight years. Using the Galaxy brand, we optimize our product portfolio in varying market conditions through our diverse and competitive smartphone lineup that includes entry-level devices through to premium models along with tablets, wearables, and digital wallet.

We will continually provide new value through our technological innovations and preparations for the future based on our unrivaled R&D capabilities. Furthermore, through our R&D efforts, we endeavor to be a market leader for paradigm shifts as we continue to innovate in eco-friendly technologies to keep advancing our products and services.

[DS Division]

The Memory Business, System LSI Business, and Foundry Business make up the DS Division. The Memory Business manufactures and sells DRAM and NAND products; the System LSI Business designs and sells mobile application processors (“mobile APs” or “APs”) and camera image sensors; and the Foundry Business is in charge of consignment production of semiconductors.

The Memory Business continues to lead the global memory market by focusing on qualitative growth by applying advanced process technology in DRAM and NAND flash products; differentiating our products via a portfolio centered on high-value solutions; and enhancing cost competitiveness, to name a few.

The System LSI Business has not been complacent, having extended its focus from mobile to include automotive chips, and is expanding its market power by enhancing collaborations with customers to offer differentiated products featuring on- device AI, high-performance IP, etc. At the same time, we continue diversify applications and develop next-generation technologies.

For Foundry Business, we are focused on capturing mid- to long-term demand by consistently enhancing our technological competitiveness in advanced nodes and expanding applications in mature nodes, all the while reinforcing our cost competitiveness.

[SDC]

In SDC, the mobile panel business’s differentiated technology is a key factor behind the increased adoption of OLED panels, and we have expanded the overall market with the release of products in a variety of applications, such as foldable devices, IT devices (tablet/notebook PCs), and automotives. Meanwhile, the large panel business is focusing on premium products— such as high-definition, ultra-large, Quantum Dot TVs—and is enhancing its competitiveness by continually improving its technology and productivity.

[Harman]

Harman’s automotive component business develops and supplies products and solutions for connected cars, and its lifestyle audio business provides consumer audio products and professional audio solutions.

In the automotive component market, Harman is a leading player and supplies car manufacturers with competitive products. In the audio market, Harman’s innovative products have firmly established a strong reputation among consumers and audiophiles alike.

Harman also offers differentiated customer experiences through its expanded collaboration with Samsung Electronics product lines; and it further strengthens each business area via in-house development and strategic acquisitions.

☞ See 『II. Businesses Overview』 for more details about each Division.

II. Businesses Overview

1. Overview

In addition to our headquarters in Korea, Samsung Electronics Co., Ltd. (Samsung Electronics, SEC, or the Company) consists of 230 subsidiaries across the world responsible for sales and production, which include 9 regional headquarters for the Device eXperience (DX) Division, 5 regional headquarters for the Device Solutions (DS) Division, and subsidiaries of Samsung Display (SDC) and Harman.

The Company's business divisions form a two-pronged framework consisting of finished products businesses and component businesses. For finished products, the DX Division is responsible for the production and sales of TVs, monitors, refrigerators, washing machines, air conditioners, smartphones, computers, network systems, and PC. For components, the DS Division manufactures and sells DRAM, NAND flash, and mobile APs; and SDC manufactures and sells panels, including mobile OLED panels. Harman manufactures and sells automotive products such as digital cockpits; car-audio products; and consumer audio products such as portable speakers and soundbars.

☞ See C. Current status of each division and D. Financial summary by organization in 『7. Other information』 for more details about each Division.

The Company's corporate headquarters—which oversees the DX and DS Divisions—and 33 consolidated subsidiaries are located in Korea. The headquarters is divided along Divisions and/or Businesses, which are located in Suwon, Gumi, Gwangju, Giheung, Hwaseong, Pyeongtaek, etc. The Company's unlisted domestic subsidiaries include Samsung Display for display panel production, Samsung Electronics Sales for domestic retail sales, Samsung Electronics Service for after-sales services, and Samsung Electronics Logitech for logistics.

We have 197 unlisted overseas subsidiaries for product manufacturing, sales, and R&D, with locations in the US, Europe/CIS, Middle East/Africa, and Asia, etc.

We have 48 subsidiaries in the Americas, including SEA, which is in charge of US sales (New Jersey; sales of finished products including TV and smartphones), SII (California; manufacturing of TVs), SSI (California; sales of semiconductors and DPs), SAS (Texas; manufacturing of semiconductor products), SEDA (Brazil; manufacturing of multiple finished products) and Harman (Connecticut; automotive components).

In Europe and CIS, we operate 67 subsidiaries, including SEUK (UK), SEG (Germany), SEF (France), SEI (Italy) for sales of finished products; SEH (Hungary) for manufacturing TVs, and SEPM (Poland) for manufacturing home appliances.

We have 21 subsidiaries in Middle East and Africa, including SGE (UAE) and SSA (South Africa) for sales of finished products and SEEG (Egypt) and SSAP (South Africa) for manufacturing TVs.

There are 32 subsidiaries in Asia (excluding China), including SESP (Singapore), SEAU (Australia), SEPCO (Philippines), and SME (Malaysia), which are responsible for regional sales. In addition, we operate numerous production sites including SEV and SEVT (Vietnam) for smartphones, SEHC (Vietnam) for TVs, SDV (Vietnam) for display panels, and SIEL (India) for multiple products.

We operate 29 subsidiaries in China, including SCIC (Beijing) and SEHK (Hong Kong) for the sales of finished products in those regions; and SSS (Shanghai) and SSCX (Xian) for semiconductor and display panel sales. Production sites for finished products include SSEC (Suzhou) and semiconductor production facilities are located in SCS (Xian) among others.

In 1H25, the Company recorded total revenue of KRW 153,706.8 billion, an increase of 5.3% year-on-year. Major customers (listed in alphabetical order) included Apple, Deutsche Telekom, Hong Kong Techtronics, Supreme Electronics, and Verizon.

2. Key products and services

A. Revenue

SEC is involved in the production and sales of finished products, including TVs, refrigerators, washers, air conditioners, smartphones, and components such as semiconductors (e.g., DRAM, NAND flash, mobile APs) and mobile OLED panels. Also, through Harman, the Company, is developing, manufacturing, and selling automotive products such as digital cockpits and car audio products; and consumer audio products such as portable speakers and soundbar speakers.

Reported revenue in 1H25, was KRW 95,287.4 billion (62% of total net sales) for DX; KRW 53,006.1 billion (34.5%) for DS; KRW 12,246.9 billion (8%) for SDC; and KRW 7,249.4 billion (4.7%) for Harman.

(KRW 100mil, %)

Organization	Major products	Revenue	Portion
DX Division	TVs, monitors, refrigerators, washing machines, air conditioners, smartphones, network systems, computers, etc.	952,874	62.0%
DS Division	DRAM, NAND flash, mobile APs, etc.	530,061	34.5%
SDC	OLED smartphone panels, etc.	122,469	8.0%
Harman	Digital cockpits, car audio products, portable speakers, etc.	72,494	4.7%
Others	Overlapping internal transactions between Divisions	-140,830	-9.2%
Total		1,537,068	100.0%

※ Includes inter-divisional transactions.

※ See 『4. Revenue and long-term contracts』 for information by each product

B. Changes in average selling price

In 1H25, the average selling price (ASP) of TVs decreased by approximately 4% and the ASP of smartphones increased by around 1% compared to the previous year's annual average. Memory-product ASP decreased by approximately 3% and the ASP of OLED panels for smartphones decreased by approximately 12%, while the ASP of digital cockpits decreased by approximately 2%.

3. Production materials and production facilities

A. Key production materials

For the DX Division, key materials include mobile AP solutions and camera modules, which are supplied by Qualcomm, Samsung Electro-Mechanics, etc., and display panels for TVs and monitors, which are supplied by AUO, etc. For the DS Division, key materials include chemicals and wafers, supplied by Soulbrain, SILTRONIC, etc., and for SDC, key materials include FPCAs and cover glass, with suppliers such as BH, Apple, etc. For Harman, key materials include system-on-chip (SoC) products, including microcontroller units, communication modules, etc., which are supplied by Nvidia and WNC, etc

(KRW 100mil, %)

B. Production material price trends

On a year-on-year basis, mobile APs—a major production material for the DX Division—saw a price increase of approximately 12%, while the prices of camera modules increased in the region of 8%, respectively. The price of TV- and monitor-use display panels stayed similar to the previous year's average. The price of wafers for semiconductor disks decreased by approximately 8%, and the price of FPCAs for SDC decreased by approximately 13%. The price of tempered glass cover glass fell by approximately 9%. For Harman, the price of SoCs decreased by about 1% and the price of communication modules increased by approximately 1%.

※ Data include internal transactions between Divisions, etc.

C. Production capacity, output, utilization rate

(Capacity)

(1,000 units)

Organization	Item	Capacity		
		1H25	2024	2023
DX Division	TV, monitor, etc.	26,331	51,795	53,552
	Smartphone, etc.	133,750	265,700	284,700
DS Division	Memory	1,019,233,649	2,238,240,405	1,926,651,546
SDC	Display panel	1,143	2,264	2,320
Harman	Digital cockpit	4,206	8,520	10,912

※ Production capacity for major product categories on a consolidated basis.

The DX Divisions' production capacity, by major product, is calculated as follows:

- the average number of lines (×) the average output per hour (×) the average operation hours per day (×) standard days of operation

Memory production capacity for the DS Division is calculated as follows:

- converted output (after packaging, 1Gb equivalent) ÷ the utilization rate

SDC's production capacity is calculated as follows:

- the total producible panel surface area ÷ the dimensions of eighth generation glass (2,200x2,500mm)

Harman's production capacity for Digital cockpit is calculated as follows:

- the number of production (assembly and test) cells for each customer/product (×) the production capacity per hour by production cell (×) the standard operation hours per day (×) standard days of operation

(Output)

In 1H25, the DX Division's output of TVs, monitors, etc., was 20,479 thousand units (major production sites in Mexico, Vietnam, Brazil, and Hungary), and smartphone output was 105,085 thousand units (major production sites in Korea [Gumi], Vietnam, India, and Brazil). The DS Division's memory output in 1Gb equivalents was 1,019,234 million (major production sites: Korea [Hwaseong, Pyeongtaek, etc.] and China). SDC's display panel output in 8th generation glass equivalents was 887 thousand units (major production sites in Korea [Cheonan, Asan]). Harman's Digital cockpit output was 2,923 thousand units (major production sites in Mexico, Hungary, and China).

(1,000 units)

Organization	Item	Output		
		1H25	2024	2023
DX Division	TV, monitor, etc.	20,479	41,354	40,085
	Smartphone, etc.	105,085	193,500	189,991
DS Division	Memory	1,019,233,649	2,238,240,405	1,926,651,546
SDC	Display panel	887	1,759	1,407
Harman	Digital cockpit	2,923	5,814	7,658

※ Output for major product categories on a consolidated basis.

(Utilization rate)

DX utilization rates in 1H25 were calculated as actual output relative to production capacity. The utilization rates were 77.8% for TVs, monitors, etc. and 78.6% for smartphones, etc.

(1,000 units)

Organization	Item	1H25		
		Production capacity	Output	Utilization rate
DX Division	TV, monitor, etc.	26,331	20,479	77.80%
	Smartphone, etc.	133,750	105,085	78.60%

The DS Division and SDC respectively operate memory and display panel production in three shifts covering 24 hours a day. Cumulative operating days including holidays were 181 days in 1H25. The utilization rate was calculated as the actual production time relative to the potential production capacity [operating days (×) number of production lines (×) 24 hours].

(Hours)

Organization	Item	1H25		
		Potential production time	Actual production time	Utilization rate
DS Division	Memory	43,440	43,440	100%
SDC	Display panel	21,720	21,720	100%

In 1H25, Harman's utilization rate was 69.5% and was calculated as actual output relative to production capacity.

(1,000 units)

Organization	Item	1H25		
		Production capacity	Output	Utilization rate
Harman	Digital cockpit	4,206	2,923	69.5%

D. Production facilities and investment

(Key facilities for production and operation)

The Company's operational activities include production, development, marketing, and sales. In Korea, operations are located in Suwon, Gumi, Gwangju, Hwaseong, Pyeongtaek, and Asan. Overseas operations in North America, Europe, and China include a total of nine regional headquarters under the DX Division, five regional headquarters under the DS Division, and subsidiaries of SDC and Harman.

1) Land-depreciation is depreciation expense of right-of-use asset as per K-IFRS 1116 (Lease).

2) Includes effects of FX rates and government subsidies.

3) Market value of major tangible assets is omitted as objective assessment is difficult.

(Capex)

The Company's capex in 1H25 was approximately KRW 23.1 trillion, with investments concentrating on capacity expansions and migration to advanced nodes; and also on infrastructure for the DS Division and SDC. The Company has continued to invest to strengthen competitiveness in next-generation memory technologies and to prepare for mid-to-long-term demand, while in system semiconductors, the investments aim to secure advanced-node capacity. The Company will focus on enhancing investment efficiency by strengthening its fundamentals and execution.

D. Sales strategy

- Expand market leadership based on premium products
- Provide differentiated value to customers through brand, products, and services
- Strengthen marketing activities to boost demand from customer/market

E. Major customers

In 1H25, major customers (listed alphabetically) included Apple, Deutsche Telekom, Hong Kong Techtronics, Supreme Electronics, and Verizon. Sales to the five major customers accounted for approximately 13% of total sales.

F. Long-term contracts

As of June 30, 2025, there were no long-term contracts that have a significant impact on the Company's financial statement.

5. Risk management and derivative trading

A. Financial risk management policy

The Company focuses on minimizing market risk, credit risk, and liquidity risk arising from operating activities. To mitigate these risks, the Company monitors each risk factor and operates corresponding financial risk management policies and programs.

The Company manages financial risks by establishing global financial risk management policies and periodically assessing risks associated with our customers and business partners; and via monitoring foreign exchange hedging and balance of funds.

Meanwhile, the Company manages exchange rate risk via monitoring exchange rates and executing transactions through local finance centers in each major region (United States, United Kingdom, Singapore, China, Brazil, and Russia). Liquidity risk is managed by managing capital as a whole by each region.

The Company's assets that are under financial risk management consist of cash and cash equivalents, short-term financial instruments, financial assets at amortized cost, trade receivables and others. The Company's liabilities under financial risk management consist of trade payables, borrowings, and others.

B. Major financial risks

(1) Market risk

(Foreign exchange risk)

The Company operates internationally and is exposed to foreign exchange risks as it conducts transactions in currencies other than the functional currency. Major currencies that are exposed to foreign exchange risk include USD, EUR, and others.

The Company focuses on minimizing the impact of foreign exchange fluctuation by maintaining an equal amount of assets and liabilities denominated in each foreign currency. To minimize foreign exchange positions, the Company's foreign exchange management policy requires transactions for normal business (including imports and exports) and for financing (such as deposits/borrowings) to be in the functional currency or for the cash-in currency to match the cash-out currency. If foreign exchange positions arise, the Company uses bond sales, forward exchanges, etc., to mitigate impacts of exchange-rate fluctuations. While such measures can reduce foreign exchange risk, they cannot remove the risk entirely. The Company efficiently manages foreign exchange risk through regular monitoring and assessments, and speculative foreign exchange transactions are strictly forbidden.

(Interest rate risk)

Interest rate risk arises from changes in the market interest rate and subsequent fluctuations in cash flows from interest income and expenses from investment and financial activities, mainly in deposits and variable-rate borrowings. The Company employs internal fund sharing to minimize external borrowings and minimize financial costs and uncertainties associated with interest rate changes.

(Stock price risk)

The Company's investment portfolio consists of direct and indirect investments in equity securities classified as financial assets at fair value through other comprehensive income and financial assets at fair value through profit or loss, which is in line with the Company's strategy.

As of June 30, 2025, a price fluctuation of marketable equity securities (listed stocks) of 1% changes 'other comprehensive income' (before income tax) by KRW 83,939 million and 'profit before tax' by KRW 1,328 million. The figures as of the same date in 2024 were KRW 66,935 million and KRW 1,351 million, respectively.

(2) Credit risk

Credit risk arises during the normal course of transactions and investing activities where clients or other parties fail to discharge an obligation. The Company sets and manages the client's and counterparty's credit limit, and evaluates their financial credit rating on a periodic basis based on the client's and counterparty's financial conditions, default history and other important factors. Adequate insurance coverage is maintained for trade receivables related to trading partners situated in higher risk countries.

Credit risk can arise from transactions with financial institutions, which include financial instrument transactions such as cash and cash equivalents, savings, and derivative instruments. To minimize such risk, the Company transacts only with banks that have a strong international credit rating (S&P A and above), and all new transactions with financial institutions with no prior transaction history are carried out after a soundness evaluation, etc. The Company generally enters into a financial agreement with no restrictions, such as debt ratio covenants, provision of collateral, and loans or borrowings repayment. The Company requires separate approval for contracts with restrictions.

The Company estimates that its maximum exposure to credit risk is equivalent to the carrying amount of its financial assets, which has been reflected after deducting the impairment losses.

(3) Liquidity risk

Liquidity risk refers to the possibility of a company having difficulties in fulfilling its obligations related to financial liabilities. Our main sources of liquidity are cash generated by business operations and funds procured from capital market and financial institutions. The main demands on our liquidity include investment for production and R&D, working capital, and dividend payouts.

The nature of our business requires making large investments, so maintaining an adequate liquidity is crucial. We maintain and manage our liquidity by estimating required cash, managing income and expenses, etc.

The Company effectively manages its liquidity risk by periodically forecasting projected cash flows and by utilizing regional cash pooling, which allows for the use of internal funds when an entity in a region lacks liquidity. The cash-pooling program allows sharing of surplus funds among entities and contributes to minimizing liquidity risk and reducing capital operation expenses and financial expenses.

In addition, the Company's headquarters provides payment guarantees to overseas subsidiaries to secure credit limit to brace for potential large liquidity needs. As of the reporting period end date, our investment ratings from international rating agencies Moody's and S&P are Aa2 and AA-, respectively, allowing us to raise capital in the capital market in a timely manner.

(4) Capital risk

The purpose of capital management is to protect our capability of continuously providing profit to our shareholders and stakeholders and to maintain a sound capital structure. To this end, the Company monitors capital on the basis of credit rating and the ratio of total liabilities to total equity.

As of June 30, 2025, the figures for total liabilities and total equity are as follows:

(KRW mil)

Type	Jun 30, 2025	Dec 31, 2024
Total liabilities	105,313,218	112,339,878
Total equity	399,561,967	402,192,070

C. Derivative instruments and put options

The Company hedges foreign currency positions by trading currency forward contracts of currencies other than won for the purpose of managing foreign exchange risk. Currency forwards are bought through a bank in the purpose of trade and hedging.

As of June 30, 2025, the Company had 3,931 currency forward contracts involving 33 foreign currencies, such as USD, EUR and JPY, and the book value of assets and liabilities as well as related gain and loss were as follows:

(KRW mil)

Type	Assets	Liabilities	Valuation gain	Valuation loss
Currency forwards	94,957	178,167	400,647	609,713

According to the shareholders' agreement signed with Rainbow Robotics Inc., its major shareholder, etc., the Company has the right, within a specific time period, to demand that the major shareholder, etc., sell all or part of their Rainbow Robotics Inc. shares to the Company or the third party designated by the Company. The Board resolved to exercise a call option to acquire 3,940,000 shares held by six major Rainbow Robotics Inc. shareholders. The acquisition price amounted to KRW 267,463 million, and the acquisition process was completed in March 12, 2025. As of the end of the first half of 2025, the fair-value exercise price of the call option held by the company has not been separately measured.

Furthermore, Samsung Display (a subsidiary of the Company) may exercise its put option to sell part of its shares of Corning Incorporated back to Corning, according to the stock trade contract with Corning on April 8, 2021.

Samsung Display may exercise its put option to sell all or part of its shares of TCL China Star Optoelectronics Technology Co. Ltd. (CSOT) to TCL Technology Group Corporation (TCL), if CSOT remains unlisted within the listing period, according to the shareholders' agreement executed with TCL and CSOT on April 1, 2021.

Fair value of the above put option as of June 30, 2025, was evaluated by Earnest & Young Global Limited.

B. Summary of R&D activities and expenditures

The Company is leading the global market by continuously developing creative and innovative products and industry-leading technology through shifting its way of thinking and understanding customer demand. The Company is doing its utmost to cement its position in the global IT industry and become a worldwide leader in industrial technology by creating and securing next-generation technology.

As of June 30, 2025, the Company's year-to-date R&D expenses were KRW 18,064.1 billion. Among this, KRW 18,052.0 billion was recognized as expenditures, excluding government subsidies and capitalized expenses.

C. R&D organization and operations

(Domestic)

The Company's R&D organizations are systematically structured into three levels based on the timing of technological commercialization. R&D teams of business units under each Division develop market-ready technologies with a 1–2 year outlook, while research institutes under each Division, such as Samsung Research and semiconductor research centers, drive development of promising technologies with a mid- to long-term outlook of 3–5 years. Also, Samsung Advanced Institute of Technology (SAIT), our comprehensive research institute, pioneers the development of core technology as seeds for future growth engines. SAIT operates at a company level and offers direction for R&D related to promising growth areas, strengthens technological competitiveness for our main businesses, and performs R&D activities to establish a creative R&D framework.

(Overseas)

The Company operates R&D organizations in the US (SRA, SFI), Ukraine (SRUKR), Russia (SRR), Japan (SRJ), China (SRC- Beijing, SRC-Nanjing, SRC-Guangzhou, SRC-Shenzhen, SSCR), India (SRI-Bangalore and SRI-Delhi), Bangladesh (SRBD), Israel (SIRC and SRIL), etc., to carry out research activities for product development and basic technological research.

As of June 30, 2025.

D. R&D results

The Company's key R&D results by organization in 1H25 are as follows:

DX Division	
Research project	Details
Galaxy S25	• Release of Galaxy S25 • S25+ • S25 Ultra, S25 Edge
Galaxy A	• Release of Galaxy A56 5G • Release of Galaxy A36 5G • Release of Galaxy A26 5G • Release of Galaxy A06 5G • Release of Galaxy M16 5G • Release of Galaxy M56 5G • Release of Galaxy M36 5G
Galaxy Book	• Release of Galaxy Book5 Pro • Release of Galaxy Book5 Pro H • Release of Galaxy Book5 360 • Release of Galaxy Book4 Edge
Neo QLED 8K	• Released QN990F featuring 8K Wireless One Connect Box, 8K AI Upscaling Pro, AI HDR Remastering Pro, AI Motion Enhancer Pro, and 8K 120Hz 4K 240Hz VRR
Neo QLED 4K	• Released QN90F, equipped with enhanced AI capabilities through the application of NQ5 SI Gen3 Processor, and featuring glare-free technology, and VRR 4K 165Hz
OLED TV	• Launched S90/S95F with enhanced AI functions through the application of NQ5 SI Gen3 Processor
Refrigerator	• Launched 36-inch T-Type refrigerator with 9-inch LCD globally, Bixby LLM, AI Vision Inside 2.0, Auto Open door, etc. • Launched FDR refrigerator featuring non-foam doors, zero-gap design and AI hybrid-cooling
Washing machine	• Launched 27-inch Vented Combo for North American market, featuring vent drying method, All-in-one , AI Home, AI Optiwash & Dry, Auto Open Door, Easy Lint Clean filter, etc. • Launched 3rd-generation Bespoke AI washing machine featuring AI Home, Bixby voice control, and AI-customized washing and pre-treatment technologies

OLED	• Developed Galaxy S25 Ultra AMOLED
QD-Display	• Developed 27" UHD 16:9 QD-OLED monitor • Developed the world's first self-luminous 27" QHD 500Hz QD-OLED Display with the highest refresh rate

※ Please refer to 『Appendix-4. R&D results (detailed)』 for more details.

7. Other information

A. Intellectual property

Intellectual property activities are an integral part of our R&D strategies—SEC registered its first US patent in 1984 and currently holds 276,869 patents around the world. The Company holds the highest number of its patents in the US and aims to address conflicts in the US more effectively.

(Number of patents registered in each country)

[As of June 30, 2025]

(Unit: No. of patents)

Country	Korea	US	Europe	China	Japan	Others	Total
No. of patents	65,831	102,269	49,543	30,602	8,800	19,824	276,869

In 1H25, the Company invested KRW 18.0 trillion in R&D and registered 5,005 domestic and 4,594 US patents.

(Number of patent registrations per year)

(Unit: No. of patents)

Country	1H25	2024	2023
Korea	5,005	7,806	8,908
US	4,594	9,227	8,958

These patents are mostly related to smartphones, smart TVs, memory, and system LSI products for the Company's strategic business products or for future use. These patents not only protect the Company's business but also play a role in keeping similar technology and patents, as well as competitors, in check. Additionally, the Company is focusing on securing early patents in new technologies ahead of others, in order to protect opportunities and have the freedom to operate when entering new businesses.

The Company has licensing agreements with Google (signed in January 2014), Nokia (January 2023), Qualcomm (July 2022), Huawei (July 2022) through which the Company has secured an extensive patent protection in mainstay businesses as well as in the fields of new business.

The Company has also been focusing on securing design patents to protect its original design applied to smartphones and smart TVs. In 1H25, the Company acquired 202 US design patents.

B. Environmental regulations

The Company strictly abides by environmental regulations on products and in the workplace, as prescribed by law. In addition, in accordance with “the low carbon green growth policy” of the Korean government, the Company reports “the amount of greenhouse gas emission and energy use” to the government and provides related information to stakeholders by providing various reports, including the Samsung Sustainability Report.

(Number of patents registered in each country)

Environmental regulation of products are becoming stricter, reflecting the concerns of governments and regulators about potential direct and indirect impact of products to consumers' health and safety as consumers. Accordingly, the Company is working to minimize the environmental impact throughout the entire life cycle of products from the development stage of components and products to manufacturing, distribution, use, and disposal. The Company offers “Eco-Partner Certification” to suppliers for components free of harmful substances, and runs an “eco-design evaluation” system to reflect eco-friendly elements on products (reduced use of resources, energy and harmful substances, and the use of eco-friendly materials) at the development stage, and operates a “waste electronics collection recycle system” in Europe, North America, Korea, and India for collecting and recycling waste electronics. These activities are in line with domestic and foreign environmental laws on electronics and are a differentiation factor for the Company and its products.

Relevant laws are as follows:

1. law on collection and recycle of waste electronics (e.g., EU WEEE Directive)
2. limit on the use of harmful substances (e.g., EU RoHS Directive, REACH Regulation)
3. regulation on energy efficiency (e.g., EU ErP Directive)

(Environmental regulations in the workplace)

The Company operates environmental pollution prevention facilities to reduce air pollution, water pollution, and waste disposal, and to minimize the discharge of pollutants, thereby minimizing impact on the surrounding environment.

Environmental management of workplace is supervised by the relevant government authorities. All production facilities, domestic and overseas, have acquired the International Occupational Health and Safety Management System Certification (ISO 14001, ISO 45001) to strengthen compliance.

Major relevant domestic and international laws are as follows:

1. Regulations related to emission of pollutants: Water Quality and Ecosystem Conservation Act, Clean Air Conservation Act, Wastes Control Act, Noise and Vibration Control Act, Environmental Impact Assessment Act
2. Management of greenhouse gas emission: Act on Allocation and Trading of Greenhouse Gas Emission, Framework Act on Carbon Neutrality and Green Growth for Coping with Climate Crisis
3. Others: Toxic Chemicals Control Act, Act on the Registration and Evaluation, etc. of Chemical Substances, Odor Control Law, Soil Environment Conservation Act

(Greenhouse gas emission and energy consumption management)

According to Article 27 (Greenhouse Gas Target Control of Controlled Emitter) of the Framework Act on Carbon Neutrality and Green Growth for Coping with Climate Crisis, the Company falls under the category of “controlled emitter,” which is an entity designated for greenhouse gas target management. Therefore, in accordance with Article 27 (3) of the above mentioned Act and Article 24 (Reporting and Verification of Amounts of Emissions) of the Act on the Allocation and Trading of Greenhouse-gas Emission Permits, the Company’s greenhouse gas emissions and energy usage, verified by a third-party, have been reported since May 2011 to the relevant authorities and opened to stakeholders. The reported amount of domestic greenhouse gas emission and energy use are provided below:

(Unit: tCO₂-eq, TJ)

	2024	2023	2022
Greenhouse gas (tCO ₂ -eq)	17,674,973	17,337,196	19,285,537
Energy (TJ)	320,701	301,616	290,024

※ Amounts include those reported by HQ and subsidiaries to the government

※ Domestic manufacturing facilities, office buildings, buildings owned by the Company, leased buildings, etc.

※ Reported Greenhouse gas emission excludes ozone depletion substances (ODS).

※ Amounts may differ based on results of governmental evaluations, etc. on emissions.

From 2015, in accordance with the Article 8 (Designation of Business Entities Eligible for Allocation) of the Act on the Allocation and Trading of Greenhouse-Gas Emission Permits, the Company is an eligible business entity under the Act.

□ Industry overview

1) TV Industry

The TV industry has produced continual innovations in picture quality. The black-and-white TV was first developed in 1926 and the color TV in 1954. Further developments in the industry led to the creation of flat panel TVs (LCD), Smart TVs, super-large TVs (QLED/OLED/Neo QLED/8K), Micro LED, and more.

TVs incorporate technologies such as chip design, circuit development, image/signal processing, and AI picture quality improvement as well as operating systems and various software to ensure smooth operation of platforms and applications. With the rapid advancement of AI technology, users can search for information about products airing on TVs in real-time or receive recommendations for related content. Furthermore, AI enables the creation of artistic images based on individual preferences, as well as device control through conversational interfaces.

The TV industry is competing fiercely to achieve the highest picture quality by integrating technologies such as Micro LED, Neo QLED and OLED. The TV market, previously dominated by 55- to 65-inch models, is now driven by the growth of super-large 85-, 98-, 100-, and 115-inch models, going beyond the previous 75- to 83-inch range and fueling overall market expansion. Accordingly, surpassing the previous 4K standard, 8K TVs are opening new markets, and TVs are now implementing technologies capable of automatically upscaling HD and FHD to higher levels.

TVs are transforming into a futuristic digital appliance as the industry adopts AI technologies. Firms, working to incorporate AI technologies into TVs, are adopting AI SoCs, optimizing picture and sound quality, and further strengthen the AI function that upscales content from lower definitions. With such technologies, TVs are able to connect digital appliances and conduct real-time monitoring while also offering new services such as maximizing energy efficiency providing an emergency alarm system.

Meanwhile, the way people perceive TV has changed dramatically following the COVID pandemic. Customers use their TVs to not only watch movies, news, or other traditional content, but also to download and enjoy images of artwork that feature in museums throughout the world. Moreover, using TVs for gaming, health-care, online meetings and education services, and other services is also gaining positive feedback from users. We release Lifestyle product lines every year that emphasize design, connectivity, and convenient, flexible installability to meet the evolving needs of customer who value individuality in this rapidly expanding niche market.

2) Mobile Industry

The mobile phone industry started with first generation analogue devices in the early 1980s that only supported voice communication and evolved to second generation, digital devices that used technology such as CDMA and GSM, where users could send voice and text messages. Third generation mobile communication standards such as WCDMA allowed users to send photos and videos.

Today, fourth generation LTE mobile communication technology with ultra-high speed data transmission is commonplace. In early 2019, the fifth generation mobile communication service, known as 5G, was launched in Korea and the US and has since been commercialized globally. The sales of 5G smartphones increased from 270 million units in 2020 to 950 million units in 2025, and the spread of 5G communications has accelerated the ecosystem of 5G convergent services, including AI, XR, and the autonomous vehicle and infrastructure industry. (TechInsights, July 2025)

The smartphone industry has grown significantly since 2007. In 2025, the smartphone portion of total HHP sales volume was approximately 87%, and the feature phone portion of the total was approximately 13%, with the latter related to demand in emerging markets. (TechInsights, June 2025). Also, as the smartphone market shows high saturation, the importance of competitiveness of the overall experience based on software for applications, UX, games, media, digital wallets, AI, security, etc., is rising alongside that of competitive hardware, which includes high-performance APs, high-definition displays, foldable form factors, multiple cameras, sensors, waterproof & dustproof features, biometric recognition, and more.

□ Market condition

1) TV Industry

TV market demand increased by 3.7% year-on-year from approximately 201.39 million units in 2023 to 208.83 million units in 2024, driven by demand related to sporting events such as the Paris Olympics. Amid trade tensions and growing global economic uncertainties in 2025, demand is expected to remain similar year-on-year at 208.71 million units. (Omdia, June 2025).

< Market share of TV >

Product	1H25	2024	2023
TV	28.9%	28.3%	30.1%

※ Global market share in revenue; from Omdia (Figure for 1H25 is a Company estimate.)

2) Mobile Industry

Due to uncertainties such as the rapidly changing global trade environment and ongoing regional conflicts, the smartphone market is projected to decline from 1.22 billion units in 2024 to 1.21 billion units in 2025 (TechInsights, June 2025) and the tablet market is expected to decline from 160 million units in 2024 to 150 million units in 2025 (TechInsights, June 2025).

□ Business Condition

1) TV Industry

We have maintained the number one position in global TV sales for the 19th consecutive year, a streak that began in 2006. Throughout this time, we consistently strengthened our marketing and sales strategies, resulting in a doubling of our market share from 14.2% at end-2006 to approximately 28% at end-2024. Furthermore, we have proactively launched innovative, premium products that align with the evolving preferences of our global consumers and distribution partners, fortifying our reputation as a trendsetter in the TV market.

In the TV market this year, super big TVs of 75 inches or more and premium TVs priced over USD 1,500 are driving market growth. The demand for such products are especially increasing in North America, Europe, Korea, Southeast Asia, and China, but intensifying competition and ongoing increases in panel prices is pressuring profitability.

Despite challenges in the business environment, we broadened our AI TV lineup in 2025 from Neo QLED and OLED to QLED and the Frame, with product launches across various categories—such as Super Big TVs and Q-Series Soundbars—to increase our market share and improve profitability.

We expanded our AI TV lineup significantly, growing from 9 series and 34 models in 2024 to 11 series and 58 models in 2025, offering consumers an even wider range of choices. Our AI TVs apply three core AI functionalities—AI Home, AI Assistant, and AI Viewing optimization—providing users with convenient smart home experiences and translation and video information search features on top of enhanced picture and sound quality.

For 2025, we are planning to launch 7 models across 2 series Neo QLED 8K and 22 models across 4 series for the Neo QLED 4K. The introduction of 100- and 115-inch models in 2025 exceeds the previous maximum display size of 98 inches and will lead the expansion of the Super Big TV market.

In OLED, we will launch 14 models across 3 series, extending the lineup to include models from 42 inches to 83 inches. We will also launch The Premiere 5, an ultra-short throw projector equipped with triple laser technology, capable of projecting a screen up to 100-inches from a distance of approximately 43cm.

Samsung Soundbars, which have maintained the top position in global sales for 11 consecutive years, boast even further enhanced performance. The 2025 Q-Series Soundbar delivers powerful bass with a subwoofer that has been reduced in size by more than half compared to predecessors. Also, the newly launched Convertible Soundbar features a built-in gyro sensor that detects the installment direction and optimizes sound output accordingly.

Moreover, Samsung Art Store, previously available only on the Frame, will feature in the 2025 Neo QLED and QLED lineup. This exclusive art subscription service for Samsung TVs offers access to over 3000 world-famous works of art through partnerships with around 70 global museums and galleries, enabling consumers to enjoy art in their everyday lives.

Also, 2025 Neo QLED 8K models and the Frame Pro are newly equipped with Wireless One Connect Box, which features omnidirectional wireless technology that allows external devices to connect even when located far from the TV, ensuring an uninterrupted viewing experience. We will continue to strengthen our leading position in the global market with timely launches of new products sporting the latest technologies.

2) Mobile Industry

SEC has always been at the forefront of the smartphone market, and we led the global market in shipments for fourteen consecutive years. (TechInsights, August 2025). To solidify our status in the overall mobile market, we continue to bolster the competitiveness of our products, including tablets, wearables (smart watches, wireless earphones, etc.), and accessories as well as our content and services businesses, such as digital health and digital wallet.

For smartphones, we establish optimal portfolios for each region, accounting for varying market conditions and the competitive environment, to offer a wide smartphone lineup ranging from mass-market to premium devices. We have been providing premium smartphones and delivering differentiated user experiences that can meet customer needs via our cutting-edge technology, which includes functions supported by generative AI, such as searches, real-time interpretation/translation, automatic summarization, and photo editing, Dynamic AMOLED 2X (120Hz) displays, digital key and content sharing using UWB (ultra wideband), ultrasonic fingerprint-on-display (FoD), and cameras specialized for night mode and 8K video recording.

In 2019, we secured early leadership in the 5G market with the release of the world's first 5G smartphone while also creating a new market with Galaxy Z Fold, enabled by foldable displays. In 2020, we launched Galaxy Z Flip, a vertically folding smartphone. The Z Flip series, characterized by its iconic design and high portability, has played a significant role in boosting preference for Galaxy products among woman and the younger generation. We continued enhancing unique foldable experiences by leveraging our technology leadership and focusing usability centering on customer values. Thus, we subsequently released the fifth and sixth generations of the Galaxy Z series, continuing to lead the foldable market.

In February 2025, we launched Galaxy S25, delivering a more enhanced and personalized mobile experiences with Galaxy AI. One UI 7, our integrated platform, offers a more natural and intuitive user experience and understands the user's context through various touchpoints like texts, voice, and images to deliver personalized AI experiences. In addition, it features the most powerful performance to date and enhanced camera experiences with the AI-powered next-generation ProVisual Engine.

In addition, we provide richer mobile experiences for our smartphone users with Galaxy Ecosystem products, including tablets that help boost productivity via virtual meetings, multitasking, and note-taking with large-screen display and S Pen; Smart watches that offer advanced fitness and wellness features with biometric sensor technology; smart rings that provide customized health information with comfortable wearability; and wireless earbuds that deliver rich, superior sound experiences.

Not content to dwell on our achievements in hardware, we have been focusing on delivering practical and helpful services such as Samsung Wallet (formerly Samsung Pay) and Samsung Health. We are evolving Samsung Wallet into a service that can replace physical wallets through functionalities that can be used for ID cards, tickets, and more, going well beyond a mere payment system. Samsung Health will strengthen its position as a comprehensive health management platform through new form factors and AI features.

Furthermore, we have continued our commitment to sustainability management through technological innovation by expanding the use of recycled materials in our products. Notably, Galaxy S25 incorporates eight types of recycled materials, including gold and copper; and for batteries, we introduced a more circular recycling system in which we extract cobalt directly from used batteries of older Galaxy devices.

In addition, Samsung in May 2023 introduced a self-repair program, and we are expanding the program's target models and countries, adding to our efforts to preserve the environment by minimizing e-waste.

Going forward, we will use our industry-leading R&D capabilities to keep providing our customers with new values via continual technological innovations and our thorough preparations for the future.

[DS Division]

□ Industry overview

In general, our Semiconductor business is divided into Memory (storage) and System LSI (logical processing). Memory semiconductor is divided into RAM products (random access memory, ones that can be both written on and read) and ROM products (read only memory).

RAM is called volatile memory as any stored information is deleted when the power is turned off. It is used for temporary loading and storage of application programs. ROM is nonvolatile and holds memory even when power is removed; it is used in input/output system, IC cards, and more.

For System LSI products, there are many categories for various applications. SoCs for mobile devices that are equipped with CPUs, GPUs, ISPs (image signal processors), and modems are our major products. The Company manufactures mobile APs for smartphones and tablets, and image sensors.

The Foundry Business makes customized semiconductors for fabless companies based on customer designs. The business resembles OEMs in the traditional manufacturing industry in the sense that companies consign the manufacturing of their products to fabrication plants, also called foundries or fabs. Many integrated device manufacturers have transitioned to fabless players due to the advancement of semiconductor processing technologies and an increased investment burden. Consequently, only a few companies (approximately five) with large capex dominate the overall foundry market.

□ Market conditions

In the memory market in the second quarter, demand for server DRAM was stronger than expected, driven by robust demand for AI servers; while the quick resumption of deferred projects by data center companies led to an increase in demand for server SSD. Additionally, industry capacity shifting toward advanced processes reduced the supply of DRAM legacy products and led to visible increases in market prices. Although tariffs and other uncertainties will persist in the second half, major data center companies are expected to continue investing, supporting steady demand for AI servers. For PCs and mobile devices, we anticipate demand to gain momentum driven by seasonal factors and the expansion of on-device AI.

The foundry market is forecast to keep growing as AI-related industries, now seen as vital to national competitiveness, are driving global investment and support. However, concerns over global demand have intensified amid US-China technological competition and rising protectionism, including domestic industry support measures, export controls, and tariffs.

< Market share of DRAM >

Product	1H25	2024	2023
DRAM	32.7%	41.5%	42.2%

※ Global market share in revenue; data from research firm DRAmEXchange. (Figure for 1H25 is a Company estimate.)

□ Business condition

In the Memory Business, for DRAM, we increased the share of HBM3E and high-capacity DDR5 sales in line with the strong server demand in the second quarter. For NAND, we are also actively addressing server SSD demand, which led to a significant reduction in inventory levels. In the second half, we will continue to focus our operations on profitability. For DRAM, we intend to actively address the market trends toward higher capacity and product diversification, driven by strong AI server demand, through products such as as HBM, high-capacity DDR5, and

LPDDR5X for server. For NAND, we plan to prioritize sales of high-capacity, high performance server/storage SSDs with our normalized inventory levels; and to accelerate the transition to V8 across all applications to enhance cost competitiveness.

System LSI is projected to see weak demand amid the global economic slowdown and geopolitical risks. However, we aim to overcome such challenges through improved profitability on the back of high-value orders and application diversification. The SOC business should continue to grow revenue backed by its entry into the Galaxy Flip model. In image sensors, we are leading the expansion of the 200-megapixel mobile market while also pursuing diversification into non-mobile applications such as automotive products. The DDI business, while maintaining a leading position in OLED for mobile, is expanding into OLED applications for laptops and tablets. Additionally, the power business is diversifying applications, including the launch of new products for server, and the security business is expanding opportunities through enhanced performance for mobile and consumer devices

Foundry is strengthening its technology and development competitiveness as well as its manufacturing and business capabilities by establishing strategies tailored for each node and application in line with market changes. In advanced nodes, we are focusing on improving process maturity. For the GAA process, 2nm mobile products are scheduled to launch in the second half, and we will provide high-quality processes to customers in multiple fields, including HPC and automotive, by leveraging our 3nm mass production experience. For mature nodes, we are expanding RF and Automotive technologies to establish a high-value-added product portfolio while meeting customer needs with solutions such as 17nm CIS/DDI, aiming to simultaneously improve profitability and ensure long-term node utilization. We will expand our business opportunities in line with the evolving markets by enhancing collaboration with customers and strengthening competitiveness across the board, including development, orders, production, and supply.

□ Industry overview

Display refers to screens in electronic devices. Active matrix technology is most commonly used in displays, including OLED (organic light emitting diode), QD-OLED (quantum dot organic light emitting diode), and TFT-LCD (thin film transistor liquid crystal display).

OLED panels use organic materials, which offer sharp contrast and color, high color gamut, and fast response rates. Such differentiating features provide advantages for use in smartphones where display features (multimedia contents, online experience, etc.) are important, and as a result, OLED adoption in the smartphone market is growing rapidly.

The market had raised concerns over the production of high-resolution, durable panels, but we overcame various technological challenges and advanced the business. OLED panels make up for the shortcomings of LCD panels, and they can be increasingly adopted into variable applications in foldables, IT (tablet/notebook PCs), automotives, etc. The OLED market is forecast to keep growing. QD-OLED, a self-emissive display with quantum dots (semiconductor particles a few nanometers in size) in the panel to maximize color gamut and viewing angle, is capturing attention under expectations that it will lead the premium TV and monitor markets.

□ Market condition

The market for smartphone display panels is anticipated to grow to 1.57 billion units in 2025 from 1.55 billion units in 2024. For smartphone-use OLED panels, the market is forecast to reach 0.83 billion units in 2025, up from 0.78 billion units in 2024, and the OLED portion of smartphone panels is expected to increase to 53.2% in 2025 from 50.7% in 2024 (Omdia, July 2025).

The market for large display panels is expected to grow to 0.91 billion units in 2025 from 0.87 billion units in 2024 (Omdia, June 2025).

< Market share of smartphone panel >

Product	1H25	2024	2023

□ Business condition

The Company has continued to stay atop the mobile OLED market in terms of market share since it successfully commercialized OLED products in 2007, marking a world's first. We diversified our product group to include displays for foldable products, tablets, watches, laptops, and automotive applications, solidifying our position as the top player in the OLED display market.

With both flexible and rigid OLED, our optimal smartphone product portfolio ranges from mass-market to premium devices as we proactively address customers' specific needs; and we are recognized as having best-in-class technology through our introduction of foldable and IT (tablet/Note PC) products with differentiated technologies and designs.

In 2025, although the smartphone market is forecast to remain stagnant due to increasing global uncertainties, we expect OLED penetration to keep rising, driven by the expansion of AI and growing demand for high-performance displays. Amid heightened competition among panel makers, we will maintain our competitive edge by strengthening product competitiveness by leveraging low-power consumption technology and an expanded product lineup featuring differentiated designs.

Regarding the 8.6G IT OLED line, preparations are tracking well with the mass production schedule, with a target of driving sales growth and leading the expanding IT OLED market. Beyond IT, we will further strengthen our business leadership by expanding our product portfolio within areas such as automotive and gaming.

In the large display market, the share of self-luminous displays continues to grow. We will strengthen our technological capabilities in QD display to increase sales of high-performance products while enhancing fundamentals, such as production efficiency, to reinforce our business competitiveness.

[Harman]

□ Industry overview

Harman competes in the automotive and lifestyle audio industries. The automotive component business accounts for the largest portion of Harman's business, and it operates business in areas such as digital cockpits, car audio, and telematics.

Consumers view vehicles not only as a mode of transportation, but also as an opportunity to enjoy in-cabin experiences. In response to such consumer needs, the market is shifting toward software defined vehicles (SDVs) that can be upgraded with software, similar to IT products. Automakers are working to introduce a centralized automotive architecture and strengthen software functionality, which has led to numerous innovations. As a result, the products supplied by automotive component manufacturers are undergoing rapid technological changes, and competition in this area seems poised to intensify. Accordingly, Harman will strengthen its software technology capabilities to align with the shift to SDVs, nurture core automotive components for in-cabin experiences, and develop new products with high growth potential such as AR HUD, display and driver monitoring. Meanwhile, we are focused on offering differentiated user experiences that increase convenience by applying Samsung's software and service capabilities to vehicles.

The Lifestyle audio business has two segments: consumer audio and professional audio solutions. Consumer audio products (e.g., true wireless stereo, portable speakers, headphones) were formerly confined to audio playback devices, but thanks to the recent adoption of wireless technologies and increasing integration of AI, they are transforming into technology-centric IT devices. Such changes have brought IT companies into the consumer audio market, and they are now competing with traditional audio-focused firms that possess sound engineering technologies.

The consumer audio market is expected to see high growth in segments such as TWS headphones, home audio products, and gaming headphones, and consumer desire is continuing to grow for premium audio experiences such as high-quality and lossless sound. In response to such trends, Harman is enhancing its business capabilities and competitiveness in high-growth areas and continuously launching new products to address market demands. To cater to consumer needs for premium audio experiences, Harman in 4Q23 acquired Roon Labs LLC, a US company that specializes in high-quality and lossless audio playback technology, offering our consumers with high quality audio experiences. Also, we are incorporating Roon technologies in products of other businesses to pursue differentiating strategies and enhance market competitiveness.

□ Market condition

Automobile production in 1H25 increased 2.3% year-on-year, showing weakness in North America and Europe but staying strong in China. OEM customers adopting a conservative approach due to tariff impacts from new, US-led global trade policies may lead to a decline in global automotive demand in 2025 (S&P Global Light Vehicle Production Forecast, June 2025).

In 1H25, digital cockpit revenue declined and market share decreased as a weak order performance during the Covid-19 pandemic in 2020 has led to a downward sales trend since 2023. In addition, reductions in sales volumes to major European and North American OEM customers and delays in the mass production of certain projects negatively impacted revenue. On the other hand, we expect sales to increase thanks to expanded new orders achieved through synergetic collaborations with the Company over recent years, with market share also showing a recovery.

< Digital cockpit market share >

Product	1H25	2024	2023
Digital cockpits	12.1%	12.5%	16.5%

※ Digital cockpits refer to the digital automotive component which enables safe driving environment via infotainment system, etc.

※ Global market share in revenue; figure for 1H25 is estimate from research firm TechInsights and S&P Global.

□ Business condition

Harman is positioned to stay at the forefront of the digital cockpit and car audio markets, which are key markets for in-cabin experiences in the automotive component industry. To fortify Harman's position, we will keep integrating our IT technologies, including wireless communication and display, into Harman's automotive business, to grow as the key automotive business and lead the shift toward software-defined vehicles.

Through its proprietary sound engineering capabilities and multi-brand strategies targeting diverse consumer groups, Harman has expanded its brand recognition and influence as professional audio company among consumers and audiophiles alike. We will further fortify our reputation and position in the audio industry by enhancing collaboration with other divisions and launching new products.

☐ Reasonable allocation of common SG&A (selling general & administrative) expenses and assets

(1) For common SG&A expenses, specific expenses that are allocable to a specific product/model are allocated to Divisions that are responsible for such product/model. However, common expenses that cannot be attributed to a specific product/model category are reasonably allocated throughout the Company based on an allocation standard (expense-to-revenue ratio, number of personnel, etc.).

(2) For common assets, assets that can be directly allocated (inventory assets, fixed assets, investment assets, etc.) are allocated to the corresponding organizational unit. Assets that are commonly managed and cannot be directly allocated are allocated to each Division based on an allocation standard (expense-to-revenue ratio, pre-tax profit, etc.).

3. Notes to consolidated financial statements

1. General Information

1.1 Company Overview

Samsung Electronics Co., Ltd. (“SEC”) was incorporated under the laws of the Republic of Korea in 1969 and listed its shares on the Korea Stock Exchange in 1975. SEC and its subsidiaries (collectively referred to as the “Company”) operate four business divisions: DX, DS, SDC and Harman. DX (Device eXperience) division comprises businesses for digital televisions, refrigerators, smartphones and communication systems. DS (Device Solutions) division comprises businesses for memory, foundry, and system Large Scale Integration (LSI). SDC includes display panels products. Harman division includes connected car systems, audio and visual products, enterprise automation solutions and connected services. SEC is domiciled in the Republic of Korea and is located in Suwon, the Republic of Korea.

These consolidated financial statements have been prepared in accordance with Korean International Financial Reporting Standards (“Korean IFRS”) 1110, Consolidated Financial Statements. SEC, as the controlling company, consolidates its 230 subsidiaries, including Samsung Display Co., Ltd. and Samsung Electronics America Inc. The Company also applies the equity method of accounting for its 34 associates and joint ventures, including Samsung Electro-Mechanics Co., Ltd.

2. Material Accounting Policies

2.1 Basis of Presentation

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in accordance with International Financial Reporting Standards as adopted by the Republic of Korea. The accompanying interim consolidated financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

The interim consolidated financial statements for the six-month period ended June 30, 2025 have been prepared in accordance with Korean IFRS 1034, Interim Financial Reporting. These interim consolidated financial statements have been prepared in accordance with the Korean IFRS which is effective as of June 30, 2025.

(A) New and amended standards adopted by the Company

The Company applied the following amended standards for the first time for the annual reporting period commencing January 1, 2025:

Amendments to Korean IFRS 1021, *The Effects of Changes in Foreign Exchange Rates*

The amendments require exchangeability of two currencies should be assessed in order to clarify reporting of foreign currency transactions in the absence of normal-functioning foreign exchange market. The amendments also require applicable spot exchange rate should be determined when the assessment indicates two currencies lack exchangeability. The adoption of the amendments does not have a significant impact on the Company's consolidated financial statements.

(B) New and amended standards not yet adopted by the Company

The amended accounting standards issued that are not yet effective for the annual reporting period commencing January 1, 2025 and have not been early adopted by the Company are as follows:

Amendments to Korean IFRS 1109, *Financial Instruments* and Korean IFRS 1107, *Financial Instruments: Disclosures*

The amendments have been implemented in order to respond to questions raised in practice and include new requirements. The amendments are effective for annual reporting periods beginning on or after January 1, 2026, with early application permitted. The amendments are as follows and impact on financial statements is under review by the Company.

- Permission to regard a financial liability as extinguished via an electronic payment system prior to the actual due date of settlement, when specified criteria are met.
- Guidelines to assess whether financial assets are merely composed of principal and interest are clarified and added.
- Disclosure of impact of contract terms that modify time and amount of contractual cash flows and the extent to which company is exposed are disclosed per each category of financial instruments
- Additional disclosure of financial assets measured at fair value through other comprehensive income

2.2 Accounting Policies

Material accounting policies and method of computation used in the preparation of the interim consolidated financial statements are consistent with those of the annual consolidated financial statements for the year ended December 31, 2024, except for the changes due to the application of amendments of standards described in Note 2.1 and as described below.

Income tax expense for the interim period is recognized based on management's best estimate of the weighted average annual income tax rate expected for the full financial year considering global minimum top-up tax. The estimated average annual effective income tax rate is applied to the pre-tax income of the interim period.

2.3 Convenience Translation into United States Dollar Amounts

The US dollar amounts provided in the consolidated financial statements represent supplementary information solely for the convenience of the reader. All Korean won amounts are expressed in US dollars at the rate of W 1,427.4 to \$1, the average exchange rate for the six-month period ended June 30, 2025. Such presentation is not in accordance with generally accepted accounting principles and should not be construed as a representation that the Korean won amounts shown could be readily converted, realized or settled in US dollars at this or at any other rate.

2.4 Material Accounting Estimates and Assumptions

In preparing the interim consolidated financial statements, the management of the Company makes judgements, estimates and assumptions on matters which affect the application of policies and reported amounts of assets, liabilities, income and expenses. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The resulting accounting estimates, by definition, seldom equal the related actual results

Material accounting estimates and assumptions made in the preparation of the interim consolidated financial statements are consistent with those applied in the preparation of the annual consolidated financial statements for the year ended December 31, 2024, except for the estimates used to determine the income tax expense.

(H) Other matters

On July 12, 2018, the Korea Securities and Futures Commission determined an initial measure following an investigation relating to Samsung Biologics Co., Ltd., an associate of the Company, and its accounting for its investment in Samsung Bioepis Co., Ltd, a joint venture between Biogen Therapeutics Inc. and Samsung Biologics Co., Ltd. This measure included a recommendation to dismiss the director in charge, prosecution charges, and external auditor designation by the regulator, on the basis that the Joint Venture Agreement was not disclosed in the notes to the financial statements. On November 14, 2018, the Korea Securities and Futures Commission determined a second measure which included a penalty of W8,000 million, a recommendation to dismiss the CEO, a requirement to restate its financial statements, and further prosecution charges.

To prove justification of its accounting treatment, Samsung Biologics Co., Ltd. filed a suit for cancellation of the aforementioned measures to the Seoul Administrative Court, which is currently in progress. On September 24, 2020, the Seoul Administrative Court announced a decision to cancel the first measure charged by the Korea Securities and Futures Commission and suspended its execution until the final rulings of appeal. On June 11, 2025, Seoul High Court upheld the original decision in the appellate court, but the Korea Securities and Futures Commission appealed to the Supreme Court of Korea on June 30, 2025. Regarding the lawsuit seeking the cancellation of the second measure, the Seoul Administrative Court rendered a judgment on August 14, 2024, to revoke the administrative disposition imposed by the Korea Securities and Futures Commission. However, the Korea Securities and Futures Commission filed an appeal on August 28, 2024, and the case is currently pending before the Seoul High Court.

Samsung Biologics Co., Ltd. also filed for suspending the execution of the initial and second measures. On January 22, 2019 and February 19, 2019, the Seoul Administrative Court pronounced decisions to suspend the second and initial measures, respectively, until the final rulings. The Korea Securities and Futures Commission immediately appealed against the decisions but the appeals were dismissed by the Seoul High Court on May 13, 2019 and May 24, 2019, in relation to the second and first measures, respectively. On May 23, 2019 and June 10, 2019, the Korea Securities and Futures Commission re-appealed against the dismissals relating to the second and first measures, respectively. On September 6, 2019 and October 11, 2019, the Supreme Court of Korea dismissed the Korea Securities and Futures Commission's re-appeal relating to the second and first measures, respectively, and confirmed the decision to suspend the execution of these measures.

Although the future outcome of the administrative litigation cannot be estimated, should Samsung Biologics Co., Ltd. be required to restate its financial statements to amend its historical accounting treatment relating to its investment in Samsung Bioepis Co., Ltd., the Company's share of profit or loss relating to its equity method investment, the amount of investment in associates, and retained earnings, for the years ended December 31, 2015 and onwards, and the profit on disposal of investment for the year ended December 31, 2016, may be impacted. Given the timing of completion and the final result of the administrative litigation between Samsung Biologics Co., Ltd. and the Korea Securities and Futures Commission is uncertain and cannot currently be estimated, it is not possible for the Company to recognize the effects of these proceedings in the current period consolidated financial statements.

25. Financial Risk Management

The Company manages its financial risks with a focus on minimizing market risk, credit risk, and liquidity risk arising from its operating activities. To this end, the Company closely monitors and responds to each risk factor.

The Company establishes global financial management standards, periodically measures customer and counterparty financial risk, and manages the risk with currency hedges and review of cash flows, etc.

The Company also manages foreign exchange risk by monitoring foreign exchange rate fluctuations through local financial centers in the major regions (United States, United Kingdom, Singapore, China, Brazil, and Russia), which act as an agent for the subsidiaries in each region to manage foreign exchange transactions. In addition, local finance centers in the major regions respond to liquidity risk through a regionally integrated financial structure.

The Company's financial assets subject to financial risk management consist of cash and cash equivalents, short-term financial instruments, financial assets at amortized cost, trade receivables and others, while its financial liabilities consist of trade payables, borrowings, and others.

(A) Market risk

(1) Foreign exchange risk

The Company is exposed to foreign exchange risk arising from its global operations through transactions in currencies other than its functional currency. The main currencies in which the Company is exposed to foreign exchange risk are the US dollar and European Euro.

The Company focuses on minimizing the impact of foreign exchange fluctuation by matching levels of assets and liabilities denominated in each foreign currency. To minimize exchange position, the Company's foreign exchange management policy requires normal business transactions, including import and export, as well as financing transactions, such as depositing and borrowing, to be in local currency or match as closely as possible cash inflows and outflows incurred in the respective foreign currencies. This reduces but may not eliminate the foreign exchange risk to which the Company is exposed. Moreover, the Company periodically evaluates and monitors the foreign exchange risk to efficiently mitigate such risk, and the speculative foreign exchange transactions are strictly prohibited.

(2) Interest rate risk

Interest rate risk for floating interest rate financial instruments can be defined as the risk of changes in the fair value of components of the statement of financial position due to changes in the market interest rates, and the risk of changes in the future cash flows of interest income and expenses arising from investing and financing activities. The Company's exposure to interest rate risk arises primarily from interest-bearing deposits and floating interest rate debt obligations, and the Company manages its exposure to interest rate risk to minimize uncertainty and cost of financing resulting from changes in interest rates.

(3) Price risk

The Company's investment portfolio consists of direct and indirect investments in equity instruments classified as financial assets at fair value through other comprehensive income and financial assets at fair value through profit or loss, which is in line with the Company's strategy.

As of June 30, 2025 and 2024, price fluctuation of marketable equity securities (listed stocks) by 1% would result in changes in other comprehensive income (before income tax) of ₩ 83,939 million and ₩ 66,935 million, respectively, and changes in profit before tax of ₩ 1,328 million and ₩ 1,351 million, respectively.

(B) Credit risk

Credit risk arises during the normal course of transactions and investing activities where customers or other parties fail to discharge an obligation. The Company monitors and sets the customer's and counterparty's credit limit on a periodic basis based

on their financial conditions, default history and other factors. Adequate insurance coverage is maintained for trade receivables related to trading partners situated in high risk countries.

Credit risk also can arise from transactions with financial institutions including transactions in financial instruments such as cash and cash equivalents, deposits, and derivative instruments. To minimize such risk, the Company transacts only with banks that have a strong international credit rating (S&P A and above), and new transactions with financial institutions which the Company does not have an existing relationship are subject to the completion of risk assessments prior to commencement of transactions. The Company generally enters into financial agreements without restrictions, such as debt ratio covenants, provision of collateral and/or repayment of loans/borrowings, and otherwise separate approvals are obtained.

The carrying amount of the Company's financial assets is net of impairment losses and the Company's maximum exposure to credit risk is equal to the carrying amount of its financial assets.

(C) Liquidity risk

Liquidity risk is the risk that a company will have difficulty in meeting all its financial obligations. The Company's main sources of liquidity are cash generated from operations and funds raised from the capital markets and financial institutions, while its main liquidity needs are for investments in production, research and development, working capital and dividends. Due to the nature of the Company's business, which involves large investments, maintaining adequate levels of liquidity is critical. The Company maintains and manages adequate liquidity through forecasting periodic cash flows, estimating required cash levels, and monitoring inflows and outflows of cash.

The Company has established Cash Pooling by region to respond effectively to liquidity risks, even when individual companies within a region are underfunded. Cash Pooling is a system that shares funds between underfunded and overfunded companies, minimizing the liquidity risk of individual companies, easing the burden of fund management, and reducing financial costs.

In addition, the Company has secured credit lines for its overseas subsidiaries by means of payment guarantees from the head office in the event of large liquidity needs, and, at the end of the period, the Company had investment grade ratings of Aa2 from Moody's and AA- from S&P, enabling it to raise funds on the capital market in a timely manner.

(D) Capital risk management

The purpose of capital management is to maintain a sound capital structure and protect the Company's ability to continue to provide benefits to its shareholders and stakeholders as a going concern. The Company monitors capital on the basis of credit ratings and debt ratio.

The debt ratios as of June 30, 2025 and December 31, 2024 are as follows:

<i>(In millions of Korean won)</i>	June 30, 2025	December 31, 2024

Debentures	-	16,427	-	16,427
Other	-	94,559	-	94,559

The levels of the fair value hierarchy and its application to financial assets and liabilities are described below.

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs)

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. These instruments are included in Level 1. The instruments included in Level 1 are listed equity investments, most of which are classified as financial assets at fair value through other comprehensive income.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where available and rely as little as possible on entity-specific estimates. If all significant inputs required to measure the fair value of an instrument are observable, the instrument is included in Level 2.

If one or more of the significant inputs are not based on observable market data, the instrument is included in Level 3.

The Company performs the fair value measurements required for financial reporting purposes, including Level 3 fair values, and discusses valuation processes and results in line with the financial reporting timelines. The Company's policy is to recognize transfers between levels at the end of the reporting period if corresponding events or changes in circumstances have occurred.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments
- The fair value of forward foreign exchange contracts determined using forward exchange rates at the reporting date, with the resulting value discounted to present value

Other techniques, such as discounted cash flow analysis, etcetera, are used to determine fair value for the remaining financial instruments. For trade and other receivables that are classified as current assets, the book value approximates a reasonable estimate of fair value.

(C) Valuation technique and the inputs

The Company utilizes a present value technique to discount future cash flows using proper interest rates for corporate bonds, government and public bonds, and bank debentures that are classified as Level 2 in the fair value hierarchy.

The following table presents the valuation technique and the inputs used for major financial instruments classified as Level 3 as of June 30, 2025.

(In millions of Korean won and percentage)

Other	(1,030,544)	133,237
Balance as of June 30	3,794,522	4,109,227

(E) Sensitivity analysis for recurring fair value measurements categorized within Level 3

Sensitivity analysis of financial instruments is performed to measure favorable and unfavorable changes in the fair value of financial instruments which are affected by the unobservable parameters, using a statistical technique. When the fair value is affected by more than two input parameters, the amounts represent the most favorable or unfavorable.

The results of the sensitivity analysis for effect on income or loss before tax from changes in inputs for major financial instruments which are categorized within Level 3 and subject to sensitivity analysis are as follows:

<i>(In millions of Korean won)</i>	Favorable changes		Unfavorable changes	
	Profit or loss	Equity	Profit or loss	Equity
Financial assets at fair value through other comprehensive income ^(*)	-	261,098	-	(167,650)
Others ^(*)	7,511	-	(7,648)	-

(*) For equity securities, changes in fair value are calculated by increasing or decreasing perpetual growth rate and weighted average cost of capital (-1% ~1%), which are significant unobservable inputs.

(*) Changes in fair value were calculated based on changes in price volatility (-5%~5%), which is a significant unobservable input.

27. Segment Information

(A) Operating segment information

The chief operating decision-maker has been identified as the Management Committee. The Company determines operating segments based on the segment information reported to the Management Committee. The Management Committee reviews the operating profits of each operating segment in order to evaluate the performance and to make strategic decisions regarding the allocation of resources to each segment.

Revenue consists mostly of product sales. The operating segments are product-based and are identified based on the internal organization and revenue streams. As of the reporting date, the operating segments are comprised of DX, DS, SDC, Harman, and others.

The segment information including depreciation, amortization and operating profits is prepared after adjusting intercompany transactions. Total assets and liabilities of each operating segment are excluded from the disclosure as these have not been provided regularly to the Management Committee.

5. Notes to Separate financial statements

1. General Information

Samsung Electronics Co., Ltd. (the “Company”) was incorporated under the laws of the Republic of Korea in 1969 and listed its shares on the Korea Stock Exchange in 1975. The Company operates two business divisions: Device eXperience (“DX”) and Device Solutions (“DS”). DX division comprises businesses for digital televisions, refrigerators, smartphones, and communication systems. DS division comprises businesses for semiconductor products such as memory, foundry and system Large Scale Integration (LSI). The Company is domiciled in the Republic of Korea and is located in Suwon, the Republic of Korea.

These financial statements have been prepared in accordance with Korean International Financial Reporting Standards (“Korean IFRS”) 1027, Separate Financial Statements.

2. Material Accounting Policies

2.1 Basis of Presentation

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (“Korean IFRS”). The accompanying interim separate financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

The interim separate financial statements for the six-month period ended June 30, 2025 have been prepared in accordance with Korean IFRS 1034, Interim Financial Reporting. These interim separate financial statements have been prepared in accordance with the Korean IFRS which is effective as of June 30, 2025.

(A) New and amended standards adopted by the Company

The Company applied the following amended standards for the first time for the annual reporting period commencing January 1, 2025:

Amendments to Korean IFRS 1021, *The Effects of Changes in Foreign Exchange Rates*

The amendments require exchangeability of two currencies should be assessed in order to clarify reporting of foreign currency transactions in the absence of normal-functioning foreign exchange market. The amendments also require applicable spot exchange rate should be determined when the assessment indicates two currencies lack exchangeability. The adoption of the amendments does not have a significant impact on the Company’s separate financial statements.

(B) New and amended standards not yet adopted by the Company

The amended accounting standards issued that are not yet effective for the annual reporting period commencing January 1, 2025 and have not been early adopted by the Company are as follows:

Amendments to Korean IFRS 1109, *Financial Instruments* and Korean IFRS 1107, *Financial Instruments: Disclosures*

The amendments have been implemented in order to respond to questions raised in practice and include new requirements. The amendments are effective for annual reporting periods beginning on or after January 1, 2026, with early application permitted. The amendments are as follows and impact on financial statements is under review by the Company.

- Permission to regard a financial liability as extinguished via an electronic payment system prior to the actual due date of settlement, when specified criteria are met.
- Guidelines to assess whether financial assets are merely composed of principal and interest are clarified and added.
- Disclosure of impact of contract terms that modify time and amount of contractual cash flows and the extent to which company is exposed are disclosed per each category of financial instruments
- Additional disclosure of financial assets measured at fair value through other comprehensive income

2.2 Accounting Policies

Material accounting policies and method of computation used in the preparation of the interim separate financial statements are consistent with those of the annual separate financial statements for the year ended December 31, 2024, except for the changes due to the application of amendments of standards described in Note 2.1 and as described below.

Income tax expense for the interim period is recognized based on management's best estimate of the weighted average annual income tax rate expected for the full financial year considering global minimum top-up tax. The estimated average annual effective income tax rate is applied to the pre-tax income of the interim period.

2.3 Convenience Translation into United States Dollar Amounts

The US dollar amounts provided in the financial statements represent supplementary information solely for the convenience of the reader. All Korean won amounts are expressed in US dollars at the rate of ₩ 1,427.4 to \$1, the average exchange rate for the six-month period ended June 30, 2025. Such presentation is not in accordance with generally accepted accounting principles, and should not be construed as a representation that the Korean won amounts shown could be readily converted, realized or settled in US dollars at this or at any other rate.

2.4 Material Accounting Estimates and Assumptions

In preparing the interim separate financial statements, the management of the Company makes judgements, estimates and assumptions on matters which affect the application of policies and reported amounts of assets, liabilities, income and expenses. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The resulting accounting estimates, by definition, seldom equal the related actual results.

Material accounting estimates and assumptions made in the preparation of the interim separate financial statements are consistent with those applied in the preparation of the annual separate financial statements for the year ended December 31, 2024, except for the estimates used to determine the income tax expense.

25. Financial Risk Management

The Company manages its financial risks with a focus on minimizing market risk, credit risk, and liquidity risk arising from its operating activities. To this end, the Company closely monitors and responds to each risk factor.

The Company establishes global financial management standards, periodically measures customer and counterparty financial risk, and manages the risk with currency hedges and review of cash flows, etc.

The Company also manages foreign exchange risk by monitoring foreign exchange rate fluctuations through local financial centers in the major regions (United States, United Kingdom, Singapore, China, Brazil, and Russia), which act as an agent for the subsidiaries in each region to manage foreign exchange transactions. In addition, local finance centers in the major regions respond to liquidity risk through a regionally integrated financial structure.

The Company's financial assets subject to financial risk management consist of cash and cash equivalents, short-term financial instruments, financial assets at amortized cost, trade receivables and others, while its financial liabilities consist of trade payables, borrowings, and others.

(A) Market risk

(1) Foreign exchange risk

The Company is exposed to foreign exchange risk arising from its global operations through transactions in currencies other than its functional currency. The main currencies in which the Company is exposed to foreign exchange risk are the US dollar and European Euro.

The Company focuses on minimizing the impact of foreign exchange fluctuation by matching levels of assets and liabilities denominated in each foreign currency. To minimize exchange position, the Company's foreign exchange management policy requires normal business transactions, including import and export, as well as financing transactions, such as depositing and borrowing, to be in local currency or match as closely as possible cash inflows and outflows incurred in the respective foreign currencies. This reduces but may not eliminate, the foreign exchange risk to which the Company is exposed. Moreover, the Company periodically evaluates and monitors the foreign exchange risk to efficiently mitigate such risk, and the speculative foreign exchange transactions are strictly prohibited.

(2) Interest rate risk

Interest rate risk for floating interest rate financial instruments can be defined as the risk of changes in the fair value of components of the statement of financial position due to changes in the market interest rates, and the risk of changes in the future cash flows of interest income and expenses arising from investing and financing activities. The Company's exposure to interest rate risk arises primarily from interest-bearing deposits and floating interest rate debt obligations, and the Company manages its exposure to interest rate risk to minimize uncertainty and cost of financing resulting from changes in interest rates.

(3) Price risk

The Company's investment portfolio consists of direct and indirect investments in equity instruments classified as financial assets at fair value through other comprehensive income, which is in line with the Company's strategy.

As of June 30, 2025 and 2024, price fluctuation of marketable equity securities (listed stocks) by 1% would result in changes in other comprehensive income (before income tax) of ₩28,734 million and ₩20,860 million, respectively.

(B) Credit risk

Credit risk arises during the normal course of transactions and investing activities where customers or other parties fail to discharge an obligation. The Company monitors and sets the customer's and counterparty's credit limit on a periodic basis based on their financial conditions, default history and other factors. Adequate insurance coverage is maintained for trade receivables related to trading partners situated in high risk countries.

Credit risk also can arise from transactions with financial institutions including transactions in financial instruments such as cash and cash equivalents, deposits, and derivative instruments. To minimize such risk, the Company transacts only with banks that have a strong international credit rating (S&P A and above), and new transactions with financial institutions which the Company does not have an existing relationship are subject to the completion of risk assessments prior to commencement of transactions. The Company generally enters into financial agreements without restrictions, such as debt ratio covenants, provision of collateral and/or repayment of loans/borrowings, and otherwise separate approvals are obtained.

The carrying amount of the Company's financial assets is net of impairment losses and the Company's maximum exposure to credit risk is equal to the carrying amount of its financial assets.

(C) Liquidity risk

Liquidity risk is the risk that a company will have difficulty in meeting all its financial obligations. The Company's main sources of liquidity are cash generated from operations and funds raised from the capital markets and financial institutions, while its main liquidity needs are for investments in production, research and development, working capital and dividends. Due to the nature of the Company's business, which involves large investments, maintaining adequate levels of liquidity is critical. The Company maintains and manages adequate liquidity through forecasting periodic cash flows, estimating required cash levels, and monitoring inflows and outflows of cash.

The Company has established Cash Pooling by region to respond effectively to liquidity risks, even when individual companies within a region are underfunded. Cash Pooling is a system that shares funds between underfunded and overfunded companies, minimizing the liquidity risk of individual companies, easing the burden of fund management, and reducing financial costs.

In addition, the Company has secured credit lines for its overseas subsidiaries by means of payment guarantees from the head office in the event of large liquidity needs, and, at the end of the period, the Company had investment grade ratings of Aa2 from Moody's and AA- from S&P, enabling it to raise funds on the capital market in a timely manner.

(D) Capital risk management

The purpose of capital management is to maintain a sound capital structure and protect the Company's ability to continue to provide benefits to its shareholders and stakeholders as a going concern. The Company monitors capital on the basis of credit ratings and debt ratio.

The debt ratios as of June 30, 2025 and December 31, 2024 are as follows:

<i>(In millions of Korean won)</i>	June 30, 2025	December 31, 2024
Total liabilities	84,671,903	88,569,470
Total equity	237,345,496	236,396,657
Debt ratio	35.7%	37.5%

26. Fair Value Measurement

(A) Carrying amounts and fair values of financial instruments by category as of June 30, 2025 and December 31, 2024 are as follows:

<i>(In millions of Korean won)</i>	June 30, 2025		December 31, 2024

Total financial liabilities	66,095,999		72,082,744	

(*) Assets and liabilities whose carrying amount is a reasonable approximation of fair value are excluded from the fair value disclosures.

(*) Assets measured at cost, amounting to W5,489,806 million and W5,265,647 million as of June 30, 2025 and December 31, 2024, respectively, are excluded, as their carrying amounts are reasonable estimates of fair value.

(*) Lease liabilities, classified under the current portion of long-term liabilities and long-term borrowings, are excluded from the fair value disclosures in accordance with *Korean IFRS 1107*.

(B) Fair value hierarchy classifications of the financial instruments that are measured or disclosed at fair value as of June 30, 2025 and December 31, 2024 are as follows:

June 30, 2025				
(In millions of Korean won)	Level 1	Level 2	Level 3	Total balance
1) Assets				
Financial assets at fair value through other comprehensive income	2,873,395	-	111,265	2,984,660
Other	-	-	-	-
2) Liabilities				
Current portion of debentures	-	7,257	-	7,257
Debentures	-	15,509	-	15,509

December 31, 2024				
(In millions of Korean won)	Level 1	Level 2	Level 3	Total balance
1) Assets				
Financial assets at fair value through other comprehensive income	2,072,180	-	104,166	2,176,346
Other	-	-	373,681	373,681
2) Liabilities				
Current portion of debentures	-	7,737	-	7,737
Debentures	-	16,427	-	16,427

The levels of the fair value hierarchy and its application to financial assets and liabilities are described below.

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs)

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. These instruments are included in Level 1. The instruments included in Level 1 are listed equity investments, most of which are classified as financial assets at fair value through other comprehensive income.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where available and rely as little as possible on entity-specific estimates. If all significant inputs required to measure the fair value of an instrument are observable, the instrument is included in Level 2.

If one or more of the significant inputs are not based on observable market data, the instrument is included in Level 3.

The Company performs the fair value measurements required for financial reporting purposes, including Level 3 fair values, and discusses valuation processes and results in line with the financial reporting timelines. The Company's policy is to recognize transfers between levels at the end of the reporting period if corresponding events or changes in circumstances have occurred.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments
- The fair value of forward foreign exchange contracts determined using forward exchange rates at the reporting date, with the resulting value discounted to present value

Other techniques, such as discounted cash flow analysis, etcetera, are used to determine fair value for the remaining financial instruments. For trade and other receivables that are classified as current assets, the book value approximates a reasonable estimate of fair value.

(C) Valuation technique and the inputs

The Company utilizes a present value technique to discount future cash flows using proper interest rates for corporate bonds, government and public bonds, and bank debentures that are classified as Level 2 in the fair value hierarchy.

The following table presents the valuation technique and the inputs used for major financial instruments classified as Level 3 as of June 30, 2025.

(In millions of Korean won, and percentage)

Classification	Fair value	Valuation technique	Level 3 inputs	Input range
Financial assets at fair value through other comprehensive income				
Samsung Venture Investment	37,144	Discounted cash flow	Permanent growth rate	1.0%
			Weighted average cost of capital	15.0%
MiCo Ceramics Co., Ltd.	55,178	Discounted cash flow and etc.	Permanent growth rate	0.0%
			Weighted average cost of capital	10.1%

(D) Changes in Level 3 instruments for the six-month periods ended June 30, 2025 and 2024 are as follows:

(In millions of Korean won)

	2025	2024
Financial assets		
Balance as of January 1	477,847	490,403
Acquisitions	-	-
Disposals	-	-
Amount recognized in profit or loss	600,606	(48,261)
Amount recognized in other comprehensive income	7,099	6,750
Other	(974,287)	-
Balance as of June 30	111,265	448,892

(E) Sensitivity analysis for recurring fair value measurements categorized within Level 3

Sensitivity analysis of financial instruments is performed to measure favorable and unfavorable changes in the fair value of financial instruments which are affected by the unobservable parameters, using a statistical technique. When the fair value is affected by more than two input parameters, the amounts represent the most favorable or unfavorable.

The results of the sensitivity analysis for effect on income or loss before tax from changes in inputs for major financial instruments which are categorized within Level 3 and subject to sensitivity analysis are as follows:

<i>(In millions of Korean won)</i> Classification	Favorable changes		Unfavorable changes	
	Profit or loss	Equity	Profit or loss	Equity
Financial assets at fair value through other comprehensive income ^(*)	-	7,488	-	(4,729)

^(*) For equity securities, changes in fair value are calculated by increasing or decreasing perpetual growth rate and weighted average cost of capital (-1% ~1%), which are significant unobservable inputs.

27. Segment Information

The chief operating decision-maker has been identified as the Management Committee. The Company determines operating segments based on the segment information reported to the Management Committee. The Management Committee reviews the operating profits of each operating segment in order to evaluate the performance and to make strategic decisions regarding the allocation of resources to each segment.

Revenue consists mostly of product sales. The operating segments are product-based and are identified based on the internal organization and revenue streams. As of the reporting date, the operating segments are comprised of DX, DS, and others.

Total assets and liabilities of each operating segment are excluded from the disclosure as these have not been provided regularly to the Management Committee.

6-1) Matters concerning the company's dividend policy

We continue to work to enhance shareholder value alongside our efforts to strengthen competitiveness of our products and businesses. In accordance with the previous shareholder return policy covering FY2021 to FY2023, we distributed an annual return of 9.8 trillion won in regular dividends as a part of a total return of 50% of free cash flow. In January 2024, we announced our shareholder return policy for FY2024 to FY2026, which maintains the terms of the previous shareholder return policy: Samsung Electronics will pay an annual regular dividend of 9.8 trillion won as a part of total shareholder returns of 50% of the free cash flow for the period covering FY2024 to FY2026. At the close of each year, we will consider executing an early return of capital beyond regular dividends if we forecast there is potential for a significant surplus. Furthermore, the Company will consider implementing a new policy flexibly before the expiration of the policy for FY2024 to FY2026 in consideration of M&A activities and cash positions.

In November 2024, the Company announced a plan to repurchase 10 trillion won worth of shares over the following 12-month period. To enhance shareholder value, the Company repurchased 3 trillion won out of the 10 trillion won worth of shares and then cancelled the acquired shares in February 2025. Also, in February 2025, the Company announced it will repurchase approximately 3 trillion won worth of shares to enhance shareholder value and for use in employee compensation, and the acquisition was completed in May 2025. In July 2025, the Company decided to acquire the remaining shares worth approximately 4 trillion to enhance shareholder value and for use in employee compensation.

6-2) Provision of predictability on dividends

Implementation of improvement measures for dividend procedure under the Articles of Incorporation

Category	Current status and plan
Decision-making body on dividend amount under the Articles of Incorporation	- Quarterly dividends are determined by the Board of Directors, and year-end dividends are determined at the AGM
Possibility of setting the dividend record date after determining the dividend amount under the articles of incorporation	- Not possible
Future plans for implementing improvement measures for the dividend procedure	- Under review

Confirmation date of year-end dividend amount and designation of dividend record date

Category	Fiscal year-end month	Distribution	Confirmation date of dividend amount	Dividend record date	Provision of dividend predictability	Remarks
Year-end dividend	December 2024	O	March 19, 2025	December 31, 2024	X	-
Year-end dividend	December 2023	O	March 20, 2024	December 31, 2023	X	-
Year-end dividend	December 2022	O	March 15, 2023	December 31, 2022	X	-

※ The Company announced a three-year shareholder return policy (2024–2026) that distributes the same amount of quarterly dividends (around 9.8 trillion won) each year, providing predictability to shareholders

The guideline for bad debt allowances for trade receivables

(1) Calculation of bad debt allowance

- Bad debt allowance is calculated using an expected credit loss impairment model which is based on write-off experience rate and future expected bad debt amount.

(2) Calculation basis of write-off experience rate and future expected bad debt:

- Write-off experience rate for each aging group of receivables is calculated based on the actual rate of credit losses to three-year average receivables balance.
- Future expected bad debt is determined taking into consideration cases of debtor bankruptcy, compulsory execution, death, disappearance, credit information of debtor and forward-looking information.

[Bad debt allowance by circumstance]

Circumstance	Rate of allowance
Dispute or conflict	25%
Receivable through utilization of third party collection agency	50%
Receivable under litigation	75%
Customer filed or in the process of filing bankruptcy	100%

(3) Instruction: Write-off is recorded when trade receivables contain the following characteristics:

- Objective proof of bad debts, such as bankruptcy, compulsory execution, discontinuance of business, debtor's death or disappearance
- Legal action has failed or the right of collection has been extinguished.
- When the third party collection agency notifies that collection is not possible.
- When the collateral is sold or insurance is received.
- When collection expense exceeds receivables amount.

E. Director independence

(1) Appointment of Directors

The Board nominates Executive Director candidates and the Independent Director Recommendation Committee nominates Independent Director candidates. Directors are then appointed at the general meeting.

A candidate for Director must meet the requirements of relevant laws and the Articles of Incorporation. Executive Directors are recommended at a Board meeting based on their expertise and leadership from among a list of candidates that is continually updated. Independent Directors candidates are recommended by the Independent Director Recommendation Committee, and the Board reviews and finalizes the choices as agenda items at an AGM. Independent Directors should have no material interests with the Company and its major shareholder; possess knowledge and experience in areas such as finance, law, IT (robotics, AI), ESG, investment, environment, energy, international trade, and risk management; and be able to fulfill the roles and responsibilities of supervising management from an independent perspective.

Please refer to 『VIII. Executives and Employees』 for more information about the career of each Director.

The Board submits shareholders' proposal for appointment of Directors at the general shareholder meeting as a separate agenda if the proposal satisfies related laws and regulations.

The composition of the Board of Directors, as appointed by shareholders, is as follows:

(2) Independent Director Recommendation Committee

The Independent Director Recommendation Committee assesses the independence and ability of potential candidates and recommends selected candidates to be appointed at the AGM. As of the reporting date (June 30, 2025), The Committee currently consists of 3 Independent Directors (Je-yoon Shin, Eun-nyeong Heo, and Myung-hee Yoo,), meeting the requirement of having Independent Directors comprise the majority of Committee members, as stipulated in Article 542-8, Paragraph 4 of the Commercial Act. After the record date, Independent Director Jun-sung Kim was appointed as a member of the Independent Director Recommendation Committee.

The Independent Director Recommendation Committee conducts a thorough evaluation for the candidates (including those recommended by Independent Directors and external organizations) of factors including Board composition, the professional background of the outgoing Independent Director, and committee engagements within the Board. Based on this assessment, the committee selects the ultimate candidate to be recommended as a member of the Independent Director.

B. Audit Committee independence

Pursuant to related laws and the Articles of Incorporation, SEC has prepared internal audit regulations which encompass composition, operation, authority, and responsibility of the Audit Committees to carry out audit related activities.

Audit Committee members are approved at general meeting of shareholders following recommendations by the Board of Directors and the Independent Director Recommendation Committee. The Audit Committee is composed of financial expert Director Je-Yoon Shin as well as Directors Myung-hee Yoo and Hye-kyung Cho, who have audit committee experience at other listed companies. The Audit Committee members have no relationship with the Company, its largest shareholder, or major shareholders that could undermine the independence of the Audit Committee. In addition, the Audit Committee meets all requirements set forth by relevant laws, such as being headed by an Independent Director.

Requirements	Requirement status	Applicable acts, etc.

Independent Director Recommendation Committee	N/A	N/A	-

※ Relationship with the Company and Company's major shareholders is in accordance with Article 542-8 of the Commercial Act.

The Audit Committee reviews accounting documents including financial statements and audit process related documents presented by the external auditor, and if needed, requests the external auditor to perform additional reviews on accounting books and records.

To ensure the reliability of accounting related disclosures, the audit committee receives and reviews a report on internal accounting control systems prepared by internal accounting managers. Also, the Audit Committee receives biannual reports from the auditing team, which include regular audits, ad-hoc audits and special audits, and attend the Board meetings and other significant meetings. The Committee receives reports on deliberations of the Management Committee and on business performance from Directors and requests additional reviews and supplementation of data as needed.

In particular, the Committee strengthened its supporting organization to conduct audits of financial accounting in conjunction with the evaluation of the internal control system. Additionally, the Committee is reinforcing its evaluation of the Compliance Officer and the audit department's compliance control activities, the operation of whistleblowing channels, and the activities of the security and personal data protection department in safeguarding trade secrets and customer information, as part of the Company's overall risk prevention efforts.

Person who instructs another person to conduct business	1,108	-	-
Total	1,117	-	-

1) Based on the number of persons as of the reporting date.

C. Stock-based compensation system excluding stock options

(1) 2024 OPI stock-based compensation

The Company has agreed, through resolutions of the Board and its Committees, to grant a portion of performance incentive as Restricted Stock Awards in January 2026 for executives. Registered executives are to receive 100% of their performance incentives in stock while others will receive at least 50% in stock according to their chosen proportion. The shares are subject to a one-year transfer restriction (2-year for president-level executives). If the stock

price at the time of grant is lower than the price of the agreement date, the number of shares granted will be reduced proportionally to the decline.

※ The reference stock price is calculated as the arithmetic average of the volume-weighted average prices over the 1-week, 1-month, and 2-months from the previous day of the reference date

Agreement date	Type of agreed stock	Number of agreed shares	Agreement participants and headcount	Grant date
January 2025	Common	1,153,815	1,053 executives	January 2026

(2) 6th term, third LTI stock compensation

The Company, through resolutions of the Board and its committees, established a plan to compensate part of the long-term performance incentives using treasury shares (at least 50% for the 3rd portion of the 6th term, as chosen by individuals; 100% for registered executives). A portion was granted in July 2025, and the remainder is scheduled to be granted in July 2026.

Agreement date	Type of agreed stock	Number of agreed shares	Agreement participants and headcount	Grant date
July 2025	Common	779,315	622 executives	July 2025
		778,984		July 2026

※ The approval decision is resolved by the Management Committee when the guarantee amount per transaction is between 0.1% and/or less than 2.5%, and by the Board of Directors when the guarantee amount per transaction is 2.5% and above.

※ SEC receives fees on the debt it guarantees depending on the maturity date of each debt guarantee, general loan interest rate, etc. SEC claimed approximately USD 2,215 thousand in guarantee fees in 2024, and it received the fees in 2025.

The company has established cash pooling by region to manage liquidity risk when individual subsidiaries within a region experience cash shortages. Subsidiaries participating in the regional cash pooling can access funds from the pooling parent (SEA, SEEH, SAPL, SCIC, etc.) at any time, reducing the need for separate borrowing with headquarters guarantees. However, to prepare for situations requiring substantial liquidity, borrowing limits are separately allocated for the pooling parent. Additionally, in regions where cash pooling is not possible due to local regulations liquidity risks are efficiently managed by setting subsidiary-specific guarantees through an integrated guarantee of obligation.

2. Acquisitions and disposals of assets with affiliates and subsidiaries

In 1H25, the Company sold assets to affiliates, including Samsung (China) Semiconductor Co., Ltd.(SCS), to increase production capacity of such affiliates. Also, the Company acquired assets including facility equipment from affiliates to improve production efficiency.

3. Sanctions and others

A. Sanctions of investigative and judicial agencies

[Summary]

(KRW mil)

Date	Agency	Subject	Punishment or measure	Amount of monetary sanction	Amount of embezzlement/breach of trust	Relevant laws
Jul 7, 2022	Gwangju District Court	Employees of SEC	Fine	6	-	Article 33 Paragraph 7, Article 34, Article 18 Paragraph 1, etc., of the Environmental Testing and Inspection Act
Feb 9, 2023	Gwangju District Court	SEC and Employees of SEC	Fine	25	-	Article 10 Paragraph 1 of the former Occupational Safety and Health Act, Article 57 Paragraph 1 of the Occupational Safety and Health Act, etc.

On January 20, 2021, the Suncheon Branch of Gwangju District Court ordered SEC employees A (11 service years) and B (8 service years) to pay a fine of KRW 3 million each for violating Article 18, etc., of the Environmental Testing and Inspection Act, and on July 7, 2022 at the retrial, the Gwangju District Court dismissed the appeal. To prevent recurrence, the Company is conducting regular cross measurement, etc.

On February 9, 2023, the Gwangju District Court issued a summary order against SEC and five SEC employees for violations of Article 10 Paragraph 1 of the former Occupational Safety, Health Act, Article 57 Paragraph 1 of the Occupational Safety and Health Act, etc. Neither the Company nor the five employees applied for a formal trial, thus resulting in the confirmation of the summary order (with fine of KRW 15 million for SEC and KRW 2 million for each employee), and the Company has subsequently paid the fine. As part of SEC's efforts to prevent recurrence of such issues, the Company has provided special education for Environmental Safety Managers and Supervisors to ensure compliance with the relevant regulations.

Pursuant to the regular assessment of the implementation of a PSM system at the Onyang site by the Ministry of Employment and Labor from February 21–23, 2022, the rating went up by one stage, but the Company was ordered to pay a fine of KRW 0.6 million for violating Article 46 (Implementation of Process-Safety Reports) Paragraph 1 of the Occupational Safety and Health Act on April 21, 2022 and has subsequently paid the fine. The Company took measures regarding the violations above and submitted a report on improvements to the Ministry of Employment and Labor. We also established a PSM Innovation Organization and a PSM Management System which manages activities related to approval, design, 12 key tasks, expertise improvement, etc. We also foster development of on-site process safety experts and conduct voluntary process safety evaluation.

On July 7, 2022, the Gwangju District Court ruled that two employees of the Company had violated Article 18, etc., of the Environmental Testing and Inspection Act, and on October 13, 2022, the City of Gwangju levied a fine of KRW 3.2 million for violating Article 39 (Self-Measurement) Paragraph 1 of the Clean Air Conservation Act concerning the record of the results of self-measurement of air pollutants, and the Company subsequently paid the fine. To enhance credibility of measurements, the Company conducts regular cross measurements, etc.

On December 14, 2022, the Ministry of Environment ordered the Company to pay a fine of KRW 2 million for violating Article 17 (Revocation of Allocation of Emission Permits) Paragraph 2 of the Act on the Allocation and Trading of Greenhouse-gas Emission Permits, and the Company has subsequently paid the fine. To prevent the recurrence and strengthen compliance, the Company has strengthened management of greenhouse-gas emitting facilities.

Pursuant to the results of the inspection of the air pollution prevention facilities on the Gwangju site by the Ministry of Environment on November 28–29, 2022, the Company was ordered to pay a fine of KRW 1.6 million for violating Article 31 (Operation of Emission Facilities and Prevention Facilities) Paragraph 1 of the Clean Air Conservation Act on December 22, 2022, and it has subsequently paid the fine. To prevent the recurrence and strengthen compliance, the Company has strengthened inspection of the air pollution prevention facilities.

Pursuant to the results of the inspection of the Occupational Safety and Health Management on the Gwangju site by the Ministry of Employment and Labor on December 19–21, 2022, the Company was ordered to pay a fine of KRW 80 thousand for violating Article 37 (Installation and Affixing of Safety and Health Signs) Paragraph 1 of the Occupational Safety and Health Act on December 23, 2022, and it has subsequently paid the fine. Also, pursuant to the results of the inspection of the Occupational Safety and Health Management on the Gwangju site by the Ministry of Employment and Labor on January 9–11, 2023, the Company was ordered to pay a fine of KRW 160,000 for violating Article 115 (Warnings on Containers of Substances Subject to Material Safety Data Preparation) Paragraph 1 and Article 37 (Installation and Affixing of Safety and Health Signs) Paragraph 1 of the Occupational Safety and Health Act on January 16, 2023, and it has subsequently paid the fine. To prevent the recurrence and strengthen compliance, the Company has strengthened monitoring of the installation and affixing of safety signs.

On August 16, 2023, the Gumi Fire Station ordered the Company to take corrective measures for violating Article 5 (Restrictions on Storage and Handling of Hazardous Substances) Paragraph 1 and Article 6 (Construction of Facilities for Hazardous Substances and Alteration Thereof) Paragraph 1 of the Safety Control Of Hazardous Substances Act at its Gumi site, and the Company subsequently completed corrective measures by applying for permission of constructing hazardous substance handling place. To prevent the recurrence and strengthen compliance, the Company has strengthened permit management regarding hazardous substance handling place.

On August 18, 2023, Personal Information Protection Commission ordered the Company to take corrective measures along with orders to pay a penalty of KRW 875.6 million and a fine of KRW 2.4 million for violating Article 29 (Duty of Safeguards) of the Personal Information Protection Act and Article 48-2 (Special Measures to Ensure Safety of Personal Information) Paragraph 1 Subparagraph 2 of the Enforcement Decree of the same Act, and it has subsequently paid the fine. To prevent the recurrence and strengthen compliance, the Company has strengthened education and security-related contracts with our system operation partners.

On August 23, 2023, City of Gwangju issued an administrative disposition (warning) and ordered the Company to pay a fine of KRW 2 million for violating Article 31 (Operation of Emission Facilities and Prevention Facilities) Paragraph 2 of the Clean Air Conservation at its Gwnagju site, and it has subsequently paid the fine. To prevent the recurrence and strengthen compliance, the Company has strengthened computer input management process regarding operating status of emission and prevention facilities.

Regarding the radiation exposure incident that occurred at the Giheung site on May 27, 2024, the Gyeonggi Regional Office of the Ministry of Employment and Labor ordered the Company to pay a fine of KRW 30 million for violating Article 54 (Measures by Business Owners in Cases of Serious Accidents) Paragraph 2 of the Occupational Safety and Health Act on October 22, 2024. However, the Company submitted an objection letter on December 17, 2024, to receive legal judgment on the applicability of the reporting obligation stipulated in the above law, and a legal proceeding (fine trial) is currently underway. In addition, following a special inspection by the Nuclear Safety and Security Commission conducted July 8–10, the Company was ordered to pay a fine of KRW 16.5 million for violating Article 91 (Measures to Prevent Radiation Damage) Paragraph 4 of the Nuclear Safety Act on October 29, 2024, and it has subsequently paid the fine. Furthermore, as a result of a general inspection by the Ministry of Employment and Labor conducted at the Giheung site from November 4 to November 15, 2024, a fine of KRW 61 million was imposed on November 26, 2024 for violating Article 16 (Supervisors) Paragraph 1 of the Occupational Safety and Health Act, and at the Hwaseong site, a fine of KRW 7 billion was imposed for violating the Article 57 (Prohibition on Concealing Occurrence of Industrial Accidents and Reporting Thereof) Paragraph 3 of the Occupational Safety and Health Act. The Company subsequently paid the fine.

The Company has been submitting improvement results to both the Ministry of Employment and Labor and the Nuclear Safety and Security Commission after taking appropriate measures for the violations, and are establishing the regular-basis radiation safety management system under our safety and health organization, which includes training radiation safety managers, maintenance by specialized radiation service companies, and distributing electronic dosimeters, and improving the process for submitting industrial accident investigation reports to ensure a safe workplace.

Regarding the potassium hydroxide contact incident occurred at the Cheonan site on September 19, 2024, the Company was ordered to pay a fine of KRW 6 million for violating Article 31 (Reporting on Awarding of Contracts for Handling Hazardous Chemical Substances) Paragraph 1 of the Chemical Substances Control Act, and it has subsequently paid the fine. To prevent recurrence, the Company is making efforts to comply with relevant laws and regulations by submitting comprehensive subcontracting report of manufacturing facility installation and maintenance companies.

Samsung Medison without prior approval exported certain items subject to conditional permission by the Ministry of Trade, Industry and Energy. Accordingly, Samsung Medison on September 4, 2023, received an administrative disposition of a training course requirement (2 persons) from the Ministry of Trade, Industry and Energy for violating Article 19 (Public Notice of Strategic Items and Export Permission Therefor), etc., of the Foreign Trade Act, and the training course provided by the Ministry of Trade, Industry and Energy on was completed on November 7, 2023. To prevent the recurrence and strengthen compliance, Samsung Medison has enhanced educational activities for personnel responsible for strategic item management and improved internal process.

C. Green management

The Company is actively securing “Designation of Green Enterprise” and “Green Technology Certifications” to follow the Low Carbon Green Growth policy of the Korean government. In particular, greenhouse gas emission and energy consumption generated at our operations are reported to the government, required by relevant law. Also, relevant information are provided transparently to stakeholders through the Sustainability Report, etc.

(Designation of Green Enterprise)

The Company strives to fulfill its responsibility as an eco-friendly enterprise by reducing pollutants, conserving resources and energy, establishing/utilizing a green management system, etc. As of June 30, 2025 (on a separate basis), our business sites in Suwon, Gumi, Giheung, Hwaseong, Pyeongtaek, Onyang, and Cheonan have been designated as green enterprises in accordance with Article 16-2 (Designation, etc., of Green Enterprise) of the Environmental Technology and Industry Support Act.

(Green Technology Certification)

The Company acquired Certification of Green Technology in accordance with Article 60 (Standardization and Certification of Green Technology and Green Industries) Paragraph 1 of the Framework Act on Carbon Neutrality and Green Growth for Coping with Climate Crisis. Since 2010, the year when the certification first began, we have consistently explored green technologies and obtained certifications. We hold valid certifications for 6 green technologies as of the end of June 30, 2025, and we have also acquired certification of “Confirmation of Green Technology Product” for 118 green-technology-applied models.

Certified Green Technologies as of June 30, 2025, are as follows:

Certification number	Description/purpose	Certification date	Expiration date
GT-24-02123	Washable electrostatic precipitator filter technology for air purification using a hybrid charge method	Oct 24, 2024	Oct 23, 2027
GT-21-01248	Power-saving technology for reducing standby power consumption of laptops using high-efficiency power conversion technology	Oct 14, 2021	Oct 13, 2027
GT-23-01728	Activating low-load operation catalyst for high-efficiency operation of heat pumps integrated with emission reduction devices	Jul 27, 2023	Jul 26, 2026
GT-20-00880	Improving energy efficiency in clothes dryers by incorporating high-efficiency heat pumps and heat exchangers	May 21, 2020	May 20, 2026
GT-20-00826	Ceiling-mounted wind-free air conditioners with micro air holes	Jan 30, 2020	Jan 29, 2026
GT-22-01562	Energy-saving dehumidification technology using dew point temperature	Nov 24, 2022	Nov 23, 2025

※ Separate basis.

(Greenhouse gas emission and energy consumption management)

According to Article 27 (Greenhouse Gas Target Control of Controlled Emitter) of the Framework Act on Carbon Neutrality and Green Growth for Coping with Climate Crisis, the Company falls under the category of “controlled emitter,” which is an entity designated for greenhouse gas target management. Therefore, in accordance with Article 27 (3) of the above mentioned Act and Article 24 (Reporting and Verification of Amounts of Emissions) of the Act on the Allocation and Trading of Greenhouse-gas Emission Permits, the Company’s greenhouse gas emissions and energy usage, verified by a third-party, have been reported since May 2011 to the relevant authorities and opened to stakeholders.

The reported amount of greenhouse gas emission and energy use on a separate basis are provided below:

(Unit: tCO₂-eq, TJ)

	2024	2023	2022
Greenhouse gas (tCO ₂ -eq)	13,962,940	13,292,087	14,925,633
Energy (TJ)	264,060	240,882	222,875

※ Separate basis.

※ Domestic manufacturing facilities, office buildings, buildings owned by the Company, leased buildings, etc.

※ Reported Greenhouse gas emission excludes ozone depletion substances (ODS).

※ Amounts may differ based on the result of governmental evaluations on emissions.

From 2015, in accordance with Article 8 (Designation of Business Entities Eligible for Allocation) of the Act on the Allocation and Trading of Greenhouse-Gas Emission Permits, the Company is an eligible business entity under the Act.

D. Certification as health-friendly company

The Company operates various medical facilities—including an in-house clinic, physiotherapy room, musculoskeletal disorder prevention center, and mental health clinic—to promote employee health, and through health promotion programs, the Company helps employees care for their own health. In recognition of our efforts, the DS Division was certified as a health-friendly company by the Minister of Health and Welfare on December 7, 2022, pursuant to Article 6-2 Paragraph 1 of the National Health Promotion Act (Validity period: December 7, 2022–December 6, 2025), and the DX Division was certified on December 1, 2024 (Validity period: December 1, 2024–November 30, 2027).

Galaxy ring July 2024	□ Galaxy Ring (July 2024) - Expands Galaxy Health experiences with a design that can be worn at all times in daily life - 11 sizes (size 5–15) - Size & weight: (Ring) 7.0 mm (W) x 2.6 mm (D); 2.3g–3.3g (size 5–15) (Cradle) 48.9 mm (H) x 48.9 mm (W) x 24.5 mm (D); 61.3g - Platform (H/W, S/W): nRF5340; Zephyr RTOS - Design and battery usage time suitable for 24/7 wearability • Slim and lightweight design for comfort • Up to 7 days of continuous health information measurement on a single charge * Size 5 18mAh–Size 13 23.5mAh - Enhanced durability with titanium material and 10 ATM, IP68 waterproofing - Offers personalized health management functions • Provides indicators and personalized insights for users' personal condition management • Supports advanced sleep analysis and coaching functions • Monitors daily life, such as high/low hear rate notifications, automatic exercise detection, etc. - Features differentiated experience for Galaxy users • Supports easy pairing, gesture control, ring location search linked to terminal • Offers optimized usability—improved usage time when worn simultaneously with watch
Network	
RAN S/W Package ~October 2024	□ vRAN* SW Package (November 2023) * vRAN(virtualized RAN) - Integrated 4th generation CPU from company "I" into our vRAN SW Package, applying it to a vRAN commercial network for the first time in industry • Successfully conducted data call on vRAN commercial network equipped with 4th generation CPU, following previous success in large-scale vRAN commercialization utilizing 3rd generation CPU □ 5G vRAN SW PKG (June 2024) - Completed RedCap Energy-saving function test (testing for reducing power consumption in 5G IoT devices) • Completed testing for vRAN-based 5G RedCap Energy-saving technology for the first time in the industry • The Company has been validating vRAN RedCap technology (including commercial vRAN network in the US) and commercial functionality for both tRAN and vRAN will be provided in the future * tRAN (traditional RAN): hardware-based base station * RedCap (Reduced Capability): 5G low-power IoT technology □ AI-based 5G Base Station quality optimization technology (AI-RAN Parameter Recommender) (October 2024) - Developed AI-based technology that automatically recommends optimal parameters for base station environments; and applied and validated the technology in commercial networks through cooperation with SKT - To be expanded in areas with frequent traffic changes to enhance perceived quality and maximize base station performance
Base stations ~August 2024	□ 3.5GHz CBRS NR Strand Smallcell (March 2023) - Developed commercial Strand Small Cell (small cell solution designed to be installed on cables), a company first - Cell solution that integrates baseband, radio, and antenna into a single form factor - Equipped with the Company's newest in-house chipset—2nd generation 5G modem SoC—and its small size enables installation on cables □ C-band NR 64T64R MMU for North America (May 2023) - More compact and lightweight 64T64R MMU allows higher output with low-power mode compared to the 1st generation □ n77 (3.4~3.8GHz) NR 64T64R new MMU for Canada (August 2024) - Developed high-output new MMU platform product applied with new PAM (power amplifier module), which has new structure - Compared to existing products, wideband support (high efficiency) enables entry into global markets that require high output and low power consumption, contributing to the expansion of the 5G market * Wideband support: Allows the simultaneous transmission of large amounts of data using a wide frequency band, resulting in faster transmission speed.

Memory	
DRAM for mobile ~July 2024	□ Development of industry's first LPCAMM (September 2023) - Developed LPDDR-based modules, leading the next-generation markets like PC and laptops - Improved performance by 50%, power efficiency by 70%, and mounting area by 60% compared to SO-DIMMs, and improved flexibility in manufacturing as well as user convenience with easy upgrade/replacement - Set to be tested using next-generation systems with major customers and slated for commercialization in 2024: expected to gain wide adoption in next-generation PCs, laptops and data centers. □ Successfully verified industry's fastest LPDDR5X operation with MediaTek (July 2024) - Completed verification on MediaTek's latest flagship mobile AP Dimensity, leading commercialization of high-performance products - The role of low-power and high-performance LPDDR DRAM is rising in the era of on-device AI - Expects expansion of applications beyond mobile to AI accelerators, servers, HPCs, and automotive
DRAM for server ~June 2025	□ Mass production of the industry's most advanced 12nm-class DRAM (May 2023) - Enhanced productivity and improved low power consumption characteristics compared to 14-nano DRAM, improving productivity by approximately 20% and reducing power consumption by approximately 23%, which maximizes next-generation computing - Produced via our completed highly advanced node that applies cutting-edge technologies, such as a capacitor utilizing a new material with a high dielectric constant - Provide high-performance and high-density DRAM solutions to meet demand for the high-throughput computing market and expand 12nm-class DRAM lineup, which will be supplied to various applications □ Development of the largest-capacity 32Gb DDR5 DRAM to date (September 2023) - 40 years after the development of 64Kb DRAM in 1983, capacity has increased by 500,000 times - Enables the production of 128GB modules without TSV processes; improved power efficiency by 10% compared to 12-nano 16Gb based modules with the same capacity - Provides high density DRAM solutions optimized for AI and enables 1TB module production - Expects to enter mass production within 2023 to be supplied to various applications such as AI and next-generation computing □ Mass production of the industry's most advanced 10nm-class (June 2025) - Enhanced productivity by over 30% compared to 10-nano 5th generation DRAM; improved low power consumption characteristics by 10% - Optimized EUV process through the application of new materials - Plans to address various AI applications by incorporating HBM into 10-nano 6th generation lineup
Graphic DRAM ~January 2025	□ Development of the industry's first GDDR7 DRAM (July 2023) - With the development of industry's fastest 32Gbps GDDR7 DRAM, we improved performance by 1.4 times and power efficiency by 20% compared to the previous 24Gbps GDDR6 - Minimized heat generation during high-speed operation through optimization of the circuit design with new package materials - Set to be tested using next-generation systems with major customers within this year and planned for a timely commercialization to gain wide adoption in next-generation graphic cards, high-performance computing and AI □ Development of the industry's first 24Gb GDDR7 DRAM (October 2024) - Applied 12nm-class scaling process for increased cell density, achieving industry's highest capacity of 24Gb - Features 40Gbps speed with PAM3 signaling, up to 42.5Gbps - Applies Clock Control Technology, achieving low-power operation and maximizing power efficiency - A wide range of applications from graphic DRAM to AI workstations and data centers □ First in the industry to produce 24Gb GDDR7 DRAM (January 2025) - Secured integration density that can meet the demand for high-density graphic cards via leading-capacity 24Gb graphic DRAM - Support industry-leading speeds of up to 42.5Gbps and a total bandwidth of 1.92TB/s, optimizing performance for next-generation AI and graphics environment - Improved thermal resistance of packaging compared to previous GDDR7 by 11%, by applying a new high thermal conductivity material and reinforced reliability under high-performance operating conditions

HBM DRAM ~February 2024	□ Unveiled ultra-high performance HBM3E DRAM Shinebolt that will lead AI technology innovation (October 2023) - Provides high-performance of up to 9.8Gbps per one data input/output pin, allowing speed capable of processing up to 1.2TB of data per second - Achieves high-level stacking for HBM chips by optimizing non-conductive film technology for dense chip stacking without gaps, and improved heat transfer coefficient by maximizing heat conduction - Currently mass-producing 8-layer and 12-layer HBM3 products and delivering samples of the next-generation HBM3E to customers □ Developed industry's first 36GB HBM3E 12H DRAM (February 2024) - Achieved industry's highest capacity of 36GB by stacking 12 layers - With Advanced TC NCF technology, achieved 12-layer stacks by maintaining the same height as 8-layer HBM3 and also improved both performance and capacity by over 50% - Enhanced vertical integration with 7 micrometer chip spacing—the industry's smallest—and applied various bump sizes - Started sample shipping to customers, with mass production expected in 1H
NAND ~September 2024	□ Mass production of 9th generation V-NAND, an industry first (April 2024) - Industry's first mass production of 1Tb TLC 9th generation V-NAND - Highest-layer V-NAND possible with Double Stack structure - Equipped with next-generation interface with the industry's smallest cell size and thinnest mold, demonstrating our technological leadership - The advanced technology reduces cell area and interference, boosting bit density by 1.5 times compared to its Gen 8 V-NAND □ Mass production of 9th generation QLC V-NAND, an industry first (September 2024) - With industry's first release of both 9th generation QLC and TLC V-NAND, we enhanced competitiveness in the next-generation NAND flash market through our high-density QLC and high-performance TLC - Achieved industry's highest layered chip by implementing innovative technologies such as a double stack structure using channel hole etching technology. - Expand applications to mobile UFS, PC/server SSDs, etc. starting from brand products
SSD for Client ~October 2024	□ Mass production of PM9C1a, a high-performance PC SSD equipped with a 5nm controller (January 2023) - Elevated performance with a new 5nm controller and 7th generation V-NAND - Enhanced speed by up to 1.8 times and power efficiency by up to 70% vs the previous generation - Supports device authentication and verification technology with strengthened security solutions such as the new adoption of the Device Identifier Composition Engine (DICE) security standard □ Mass production of SSD PM9E1 for PC, the industry's highest performance and largest capacity (October 2024) - Supports 8-channel PCIe 5.0 and features 8th generation V-NAND, enabling top industry performance - Able to store large files such as AI-generated content, with 4TB high-capacity option - Improved up to 2x in performance and over 50% in power efficiency compared to predecessor PM9A1a - Applied new SPDm 1.2 version security solution to prevent data tampering and forgery

14/16" OLED for Galaxy Book 3 Pro February 2023	☐ Development of the world's first large-sized (16") OCTA technology - Expanded the application of OCTA—touch-integrated technology—from smartphone OLED to middle-sized laptop OLED panels - Minimized the dead space of panels via development of new materials and process technologies - Reduced power consumption with the first adoption of OLED notebooks with refresh rate of 48–120Hz
16" OLED Development for HP Elitebook April 2023	☐ Achieves power-efficiency and durability through improvements in OLED organic materials - 16" WQ+ (2,880 x 1,800, 16:10) - Applied 48Hz–120Hz, VRR (Variable Refresh Rate) and received AMD Freesync Premium Pro certification; provides an optimal gaming environment
OLED for Google Pixel 8 pro October 2023	☐ Through application of new OLED materials that are highly efficient and long-lasting, high luminance (HBM 1,600nits, peak 2,400nits) was achieved. - 6.7" WQXGA+ (1,344 x 2,992) - Applied 1–120Hz VRR (variable refresh rate) and technology to minimize dead space
Galaxy S24 AMOLED January 2024	☐ Galaxy S24 (6.16"FHD+, 6.66"WQ+, 6.79WQ+) - Combines high-resolution low power consumption technology with technology to minimize panel dead space - Achieves high-luminance, low power and slim bezel and improves image quality and user experience
31.5"UHD, 27"QHD QD-OLED January 2024	☐ Developed 31.5" (140ppi), 27" (360Hz) QD-OLED monitor - Developed self-emitting display with high-resolution (140ppi) and high refresh rate (360 Hz) with precision inkjet printing technology and Samsung's AI- based operating algorithms
BMW Mini 13.4" 185ppi June 2024	☐ 13.4" Round OLED Display for vehicle Center Information Display (1,752 x 1,660) - Applies round automotive displays for the first time - Ensures uniform characteristics across areas on atypical displays with newly developed compensation circuit and panel structure - Developed large-area atypical OCTA technology
Surface Pro 10 May 2024	☐ 13" WQ+ (2,880x1,920, 3:2) - 30Hz low-frequency drive technology for notebook OLED for the first time, achieving low power consumption (variable refresh rate from 30 to 120Hz)
Foldable OLED for Galaxy Z Fold6 July 2024	☐ 7.61" (2,160x1,856) Display for foldables - Improves luminance efficiency and visibility with new panel structure/materials, achieving low power consumption and enhancing picture quality - Applies structures/materials with enhanced foldable durability
OLED for Google Pixel 9proXL September 2024	☐ 6.75" high resolution/low power smartphone Display · 1,344 x 2,992, Peak brightness 3,000nit - Improves brightness, lifespan, and picture quality and reduces power consumption by 10% by applying low-power panel structure and high-efficiency new organic materials
Galaxy S25 Ultra AMOLED January 2025	☐ 6.86" WQ (1,440 x 3,120) - Compared to the previous generation, increased display size and reduced the thickness of both sides and bottom borders to provide a full screen and slim design - 120Hz refresh rate, high brightness (peak 2,600nit)
